**Feminist in a Software Lab** Tara McPherson, 2018-02-19 For over a dozen years the Vectors Lab has experimented with digital scholarship through its online publication Vectors and through Scalar a multimedia authoring platform The history of this software lab intersects a much longer tale about computation in the humanities as well as tensions about the role of theory in related projects Tara McPherson considers debates around the role of cultural theory within the digital humanities and addresses Gary Hall's claim that the goals of critical theory and of quantitative or computational analysis may be irreconcilable or at the very least require far more time and care She then asks what it might mean to design from conception digital tools and applications that emerge from contextual concerns of cultural theory and in particular from a feminist concern for difference This path leads back to the Vectors Lab and its ongoing efforts at the intersection of theory and praxis     *Reversible Logic Synthesis Methodologies with Application to Quantum Computing* Saleem Mohammed Ridha Taha, 2015-09-24 This book opens the door to a new interesting and ambitious world of reversible and quantum computing research It presents the state of the art required to travel around that world safely Top world universities companies and government institutions are in a race of developing new methodologies algorithms and circuits on reversible logic quantum logic reversible and quantum computing and nano technologies In this book twelve reversible logic synthesis methodologies are presented for the first time in a single literature with some new proposals Also the sequential reversible logic circuitries

are discussed for the first time in a book Reversible logic plays an important role in quantum computing Any progress in the domain of reversible logic can be directly applied to quantum logic One of the goals of this book is to show the application of reversible logic in quantum computing A new implementation of wavelet and multiwavelet transforms using quantum computing is performed for this purpose Researchers in academia or industry and graduate students who work in logic synthesis quantum computing nano technology and low power VLSI circuit design will be interested in this book Light, Paper, Process Virginia Heckert, 2015-04-14 From its beginnings photography has been shaped by the desire to understand and explore the essence of the medium Light Paper Process features the work of seven artists Alison Rossiter Marco Breuer James Welling Lisa Oppenheim Chris McCaw John Chiara and Matthew Brandt who investigate the possibilities of analog photography by finding innovative surprising and sometimes controversial ways to push light sensitive photographic papers and chemical processing beyond their limits A panoply of practices emerges in the work of these artists Some customize cameras with special lenses or produce images on paper without a camera or film Others load paper rather than film in the camera or create contact printing with sources of light other than the enlarger while still others use expired photographic papers and extraneous materials such as dust and sweat selected to match the particular subject of the photograph All of the artists share a willingness to embrace accident and chance Trial and error contribute to an understanding of the materials and their potential as do the attitudes of underlying curiosity and inventive interrogation The act of making each image is like a performance with only the photographer present The results are stunning This lavish publication accompanies an eponymous exhibition on view at the J Paul Getty Museum from April 14 to September 6 2015
