Enacted Mathematics Curriculum Denisse R Thompson,Zalman Usiskin,2014-01-01 This volume is an outgrowth of the Conference on Research on the Enacted Mathematics Curriculum funded by the National Science Foundation and held in Tampa Florida in November 2010 The volume has the potential to be useful to a range of researchers from established veterans in curriculum research to new researchers in this area of mathematics education The chapters can be used to generate conversation about researching the enacted mathematics curriculum including similarities and differences in the variables that can and should be studied across various curricula As such it might be used by a curriculum project team as it outlines a research agenda for curriculum or program evaluation It might also be used as a text in a university graduate course on curriculum research and design The chapters in this volume are a natural complement to those in *Approaches to Studying the Enacted Mathematics Curriculum* Heck Chval Weiss Ziebarth 2012 also published by Information Age Publishing While the present volume focuses on a range of issues related to researching the enacted mathematics curriculum including theoretical and conceptual issues the volume by Heck et al provides insights into different instrumentations used by groups of researchers to study curriculum enactment An Age of Accountability John L. Rury,2023-10-13 *An Age of Accountability* highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and

services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Perturbative and Non-perturbative Approaches to String Sigma-Models in AdS/CFT Edoardo Vescovi, 2017-08-17 This thesis introduces readers to the type II superstring theories in the AdS₅ S⁵ and AdS₄ CP³ backgrounds Each chapter exemplifies a different computational approach to measuring observables conformal dimensions of single trace operators and expectation values of Wilson loop operators relevant for two supersymmetric theories the N = 4 super Yang Mills theory and the N = 6 Chern Simons matter ABJM theory Perturbative techniques have traditionally been used to make quantitative predictions in quantum field theories but they are only reliable as long as the interaction strengths are weak The anti de Sitter conformal field theory AdS/CFT correspondence realizes physicists dream of studying strongly coupled quantum field theories with enhanced symmetries using the methods provided by string theory The first part of the thesis sets up the semiclassical quantization of worldsheet sigma model actions around string solutions of least area in AdS space This machinery is used to capture quantum corrections at large coupling to next to leading and next to next to leading order by solving the determinants of partial differential operators and by computing Feynman diagrams respectively In turn the second part presents an innovative approach based on Monte Carlo simulations to finite coupling for a lattice discretized model of the AdS₅ S⁵ superstring action The thesis focuses on fundamental aspects as well as on applications previously published by the author and offers a valuable reference work for anyone interested in the most recent developments in this field
