High Performance Basalt Fiber Peng-Cheng Ma,Dan Xing,2025-06-03 Basalt fiber possesses many superior properties such as excellent mechanical properties high resistance to the chemical temperature and environmental attacks and outstanding electrical and sound insulation In addition it is cost effective and environmentally friendly because the raw materials are widely found in nature and the fiber can be discarded into the environment without any negative effect Basalt fiber has attracted great attention as reinforcement for composites in recent years and developed materials have been extensively used in transportation automobile aerospace and civil engineering Despite its many attractive attributes and the contributions of basalt fiber there are still numerous challenges to be addressed in terms of preparation properties and application In addition some of the merits of this high performance fiber reported in the literature are usually inconsistent and incomplete where intuition often prevails over rationality High Performance Basalt Fiber Fundamentals and Applications provides a comprehensive and systematic review of the latest developments in this important research field It offers a

complete and thorough analysis of the correlation between the structure and properties of basalt fiber as well as key methods and technologies for the preparation and application of this fiber and its related composites. There is also a detailed overview of the history of basalt fiber as well as functionalization and recent state-of-the-art progress on basalt fiber and its corresponding composites. The book will thus fill a gap in the field in terms of not only covering the theory but more importantly the latest technologies. Covers key challenges that need to be addressed in terms of preparation, properties, and application of basalt fiber and basalt fiber reinforced composites. Illustrates the factors affecting the mechanical properties of basalt fibers to obtain high performance. Covers the preparation technology of basalt fiber and the relationship between its structure and properties. Looks at different fiber surface treatment technologies as well as application of basalt fiber reinforced composites and their products. Covers fundamental aspects to real applications. **Scientific and Technical Aerospace Reports**, 1979
