HUMAN ANATOMY AND PHYSIOLOGY

Study of the human anatomy and physiology

Anatomy

The study of the structure of the human body

Physiology

The study of the function of the human body

Structural levels

Studying the human body at the structural levels

- 1. Chemical level: study of the chemical composition of the body
- 2. Cellular level: study of the structure and function of cells
- 3. Tissue level: study of the structure and function of tissues
- 4. Organ level: study of the structure and function of organs
- 5. System level: study of the structure and function of body systems
- 6. Organism level: study of the structure and function of the whole body

CELLS AND TISSUES

Cells are the basic units of structure and function

Organization of cellular levels

Cells are organized into tissues

Tissues are organized into organs

Organs are organized into systems

Systems are organized into the whole body

The whole body is organized into the human organism

The Epithelium is the outermost layer of cells

Connective tissue is the tissue that holds cells together

Muscle tissue is the tissue that contracts

Nerve tissue is the tissue that conducts electrical impulses

Epithelial cells are the cells that line the body surfaces

Connective tissue cells are the cells that support and connect other cells

Muscle cells are the cells that contract and produce movement

Nerve cells are the cells that conduct electrical impulses

ORGANS

Organs are structures made up of different tissues

Each organ has a specific function

Organs are organized into systems

Systems are organized into the whole body

The whole body is organized into the human organism

Organ systems

Organ systems are groups of organs that work together

Each organ system has a specific function

Organ systems are organized into the whole body

The whole body is organized into the human organism

Organ systems

Organ systems are groups of organs that work together

Each organ system has a specific function

Organ systems are organized into the whole body

The whole body is organized into the human organism

SYSTEMS

Systems are groups of organs that work together

Each system has a specific function

Systems are organized into the whole body

The whole body is organized into the human organism

Organ systems are groups of organs that work together

Each organ system has a specific function

Organ systems are organized into the whole body

The whole body is organized into the human organism

Organ systems are groups of organs that work together

Each organ system has a specific function

Organ systems are organized into the whole body

The whole body is organized into the human organism

Organ systems are groups of organs that work together

Each organ system has a specific function

Organ systems are organized into the whole body

The whole body is organized into the human organism

Organ systems are groups of organs that work together

Each organ system has a specific function

Organ systems are organized into the whole body

The whole body is organized into the human organism

Organ systems are groups of organs that work together

Each organ system has a specific function

Organ systems are organized into the whole body

The whole body is organized into the human organism

Organ systems are groups of organs that work together

Each organ system has a specific function

Organ systems are organized into the whole body

The whole body is organized into the human organism

Organ systems are groups of organs that work together

Each organ system has a specific function

Organ systems are organized into the whole body

The whole body is organized into the human organism

Organ systems are groups of organs that work together

Each organ system has a specific function

Organ systems are organized into the whole body

The whole body is organized into the human organism

Organ systems are groups of organs that work together
