Cardiovascular Magnetic Resonance Spectroscopy Saul Schaefer, Robert S. Balaban, 2012-12-06 The application of magnetic resonance spectroscopy MRS to the cardiovascular system is a relatively new phenomenon Its ability to noninvasively examine myocardial metabolism has led to its use to answer basic questions in animal models of normal and diseased myocardium Extension of these investigations into the realm of human myocardial metabolism has been made possible by the advent of relatively high field magnets with spectroscopy capabilities and sufficient bore dimensions to allow human studies While ongoing and future studies promise to enhance our understanding of

myocardial metabolism their success will in part depend on a thorough understanding of the technical and biologic aspects of cardiovascular MRS as well as the current state of research in the many areas encompassed by this discipline It is with concept that the present monograph has been written The organization and content should lend this book to both the beginning reader who is interested but not conversant in cardiovascular MRS as well as to the active investigator who wishes to refer to a volume that deals with the many issues of this field in a concise but complete manner The monograph is structured with a general overview of the field followed by a section addressing the technical issues of cardiovascular MRS The next section is devoted to biologic issues of both normal and abnormal myocardial metabolism primarily devoted to investigations employing phosphorus 31 This is followed by a section dealing with more specialized issues generally involving other nuclei such as protons carbon and sodium Finally the clinical applications of cardiovascular MRS are addressed

Human Heart, Cosmic Heart Thomas Cowan, 2016-10-22 This book is life changing for those trying to understand their own bodies or those of loved ones and it is truly transformative in the hands of medical professionals especially young doctors Foreword Reviews Thomas Cowan was a 20 year old Duke grad bright skeptical and already disillusioned with industrial capitalism when he joined the Peace Corps in the mid 1970s for a two year tour in Swaziland There he encountered the work of Rudolf Steiner and Weston A Price two men whose ideas would fascinate and challenge him for decades to come Both drawn to the art of healing and repelled by the way medicine was and continues to be practiced in the United States Cowan returned from Swaziland went to medical school and established a practice in New Hampshire and later San Francisco For years as he raised his three children suffered the setback of divorce and struggled with a heart condition he remained intrigued by the work of Price and Steiner and in particular with Steiner's provocative claim that the heart is not a pump Determined to practice medicine in a way that promoted healing rather than compounded ailments Cowan dedicated himself to understanding whether Steiner's claim could possibly be true And if Steiner was correct what then is the heart What is its true role in the human body In this deeply personal rigorous and riveting account Dr Cowan offers up a daring claim Not only was Steiner correct that the heart is not a pump but our understanding of heart disease with its origins in the blood vessels is completely wrong And this gross misunderstanding with its attendant medications and risky surgeries is the reason heart disease remains the most common cause of death worldwide In *Human Heart Cosmic Heart* Dr Thomas Cowan presents a new way of understanding the body's most central organ He offers a new look at what it means to be human and how we can best care for ourselves and one another This book deserves to be in everyone's library It is loaded with great information and it can save your life or the life of someone you love Dr Joseph Mercola
