

Neuron Anatomy Activity

The parts of the neuron have been labeled. Your challenge is to write the correct name for each part and explain what it does. If you need some help, ask your tutor or consult the lecture notes/Google.

1. Axon terminals

Release the neurotransmitters/
information of the presynaptic cell

2. Myelin Sheath – nodes

Allows electrical impulses to be
transmitted quickly and efficiently
along the nerve cells

3. Axon

Carries impulses/ information away
from the nerve/ cell body

4. Soma (Cell body)

Contain genetic information,
maintains the structure of the
neuron and provides energy to drive
activities

5. Nucleus

Needed for the production of
proteins within the cell

6. Dendrites

Receiving part of the neuron.
Receives synaptic input from the

Dendritic spines: from shape to function Nicolas Heck,Ruth Benavides-Piccione,2016-02-03 One fundamental requisite for a comprehensive view on brain function and cognition is the understanding of the neuronal network activity of the brain Neurons are organized into complex networks interconnected through synapses The main sites for excitatory synapses in the brain are thin protrusions called dendritic spines that emerge from dendrites Dendritic spines have a distinct morphology with a specific molecular organization They are considered as subcellular compartments that constrain diffusion and influence signal processing by the neuron and hence spines are functional integrative units for which morphology and function are tightly coupled The density of spines along the dendrite reflects the levels of connectivity within the neuronal network Furthermore the relevance of studying dendritic spines is emphasized by the observation that their morphology changes with synaptic plasticity and is altered in many psychiatric disorders The present Research Topic deals with some of the most recent findings concerning dendritic spine structure and function showing that in order to understand how brain neuronal activity operates these two factors should be regarded as being intrinsically linked
