The Seed Alexandra Kimball, 2019-04-10 Notes on desire reproduction and grief and how feminism doesn t support women struggling to have children In pop culture as much as in policy advocacy the feminist movement has historically left infertile women out in the cold This book traverses the chilly landscape of miscarriage and the

particular grief that accompanies the longing to make a family Framed by her own desire for a child journalist Alexandra Kimball brilliantly reveals the pain and loneliness of infertility especially as a lifelong feminist Her experience of online infertility support groups where women gather in forums to discuss IVF surrogacy and isolation leaves her longing for a real life community of women working to break down the stigma of infertility In the tradition of Eula Biss's *On Immunity* and Barbara Ehrenreich's *Bright Sided* Kimball marries perceptive analysis with deep reportage her findings show the lie behind the prevailing and at times paradoxical cultural attitudes regarding women's right to actively choose to have children Braiding together feminist history memoir and reporting from the front lines of the battle for reproductive rights and technology *The Seed* plants in readers the desire for a world where no woman is made to feel that her biology is her destiny

Willis, 1984 The third volume in the author's *Horror and Science Fiction Films* series covers new titles released from 1981 to 1983 and updates entries in the original list *Twentieth-century Science Fiction Writers*, 1986 **Terraforming** Chris Pak, 2016 This book examines terraforming in science fiction and shows how amidst contemporary anxieties about climate change it has come to offer an important vantage from which to consider the ways humankind shapes and is shaped by their world **Beyond the Screen and Page** Brandon Michaels, 2025-01-28 Step into a universe where words transcend dimensions *Beyond the Screen and Page* is a vibrant poetic anthology that journeys through the captivating worlds of science fiction From iconic TV series like *Stargate* and *Firefly* to unforgettable films and groundbreaking novels such as *Dune* and *Hyperion* Brandon Michaels masterfully reimagines these tales in verse Each poem celebrates the resilience wonder and struggles that define humanity and beyond in the infinite cosmos With vivid imagery and rhythmic storytelling this collection invites readers to revisit their favorite characters epic battles and timeless quests all while uncovering fresh perspectives on the stories that have shaped the genre Whether you're a fan of the screen the page or the stars this book is a tribute to the creativity that brings science fiction to life Prepare to be transported through time space and imagination as you experience the essence of sci fi like never before Contemporary Authors Scot Peacock, 2002-12 Your students and users will find biographical information on approximately 300 modern writers in this volume of *Contemporary Authors R* *A Friend of All Faiths* Michael H. Cohen, 2007-05-29 *A Friend of All Faiths* describes an education in spirit and shadow through encounters with the numinous moving with great force through the heart as pulsations of love touching religious myth ritual dream and vision and revealing intuitive aspects of personal transformation Equipping Space Cadets Emily Midkiff, 2022-04-19 Winner of the 2023 Science Fiction Research Association SFRA Book Award 2022 Longlist Nominee for the Best Non Fiction Award from the British Science Fiction Association *Equipping Space Cadets* Primary Science Fiction for Young Children argues for the benefits and potential of primary science fiction or science fiction for children under twelve years old Science fiction for children is often disregarded due to common misconceptions of childhood When children are culturally portrayed as natural and simple they seem like a

poor audience for the complex scientific questions brought up by the best science fiction. The books and the children who read them tell another story. Using three empirical studies and over 350 children's books including *If I Had a Robot Dog*, *Bugs in Space* and *Commander Toad in Space*, *Equipping Space Cadets* presents interdisciplinary evidence that science fiction and children are compatible after all. Primary science fiction literature includes many high quality books that cleverly utilize the features of children's literature formats in order to fit large science fiction questions into small packages. In the best of these books, authors make science fiction questions accessible and relevant to children of various reading levels and from diverse backgrounds and identities. *Equipping Space Cadets* does not stop with literary analysis but also presents the voices of real children and practitioners. The book features three studies: a survey of teachers and librarians, quantitative analysis of lending records from school libraries across the United States, and coded read aloud sessions with elementary school students. The results reveal how children are interested in and capable of reading science fiction, but it is the adults, including the most well intentioned librarians and teachers, who hinder children's engagement with the genre due to their own preconceptions about the genre and children.

Seas and oceans cover most of the Earth's surface yet we know less about what lies beneath them than we do about stars and planets millions of miles away. The answers to these questions and more can be found in *Unsolved Mysteries of the Sea*.
