Anatomy And Physiology Class Description

Marcel A. Müller

Anatomy And Physiology Class Description:

The Not-So-Intelligent Designer Abby Hafer, 2016-09-29 Why do men's testicles hang outside the body? Why does our appendix sometimes explode and kill us? And who does the Designer like better anyway, us or squid? These and other questions are addressed in *The Not So Intelligent Designer*. Dr. Abby Hafer argues that the human body has many faulty design features that would never have been the choice of an intelligent creator. She also points out other animals that got better body parts which makes the Designer look a bit strange, discusses the history and politics of Intelligent Design, and creationism, reveals animals that shouldn't exist according to Intelligent Design, and disposes of the idea of irreducible complexity. Her points are illustrated with pictures by Alexander Winkler with wit and erudition. [The Hidden Curriculum—Faculty-Made Tests in Science](#)
