Study of the human organism and its internal body

Anatomy

The study of the structure of the human body and its internal organs

Physiology

The study of the function of the human body and its internal organs

Structural levels

Studying the human body at the cellular, tissue, organ, and system levels

- 1. **Cellular level** - study of the structure and function of cells
- 2. **Tissue level** - study of the structure and function of tissues
- 3. **Organ level** - study of the structure and function of organs
- 4. **System level** - study of the structure and function of systems
- 5. **Organism level** - study of the structure and function of the whole organism

CELLS AND TISSUES

Cells are the basic units of structure and function of the human body

Characteristics of cells

All cells are eukaryotic and have a nucleus

Cells are specialized for their function

Cells are surrounded by a cell membrane

Cells are capable of self-renewal
