Ford,Laurie W. Ford,2009-08-10 Talk is powerful Engaging in the right conversation at the right time is key to both personal and organizational success And it isn't just difficult conversations that matter The Four Conversations clearly demonstrates it is the everyday dialogue we have with one another that is critical Armed with a solid body of research and their own first hand observations Jeffrey and Laurie Ford identify four types of conversations that every one of us must use to get things done initiative conversations to introduce something new understanding conversations to help people relate to new ideas or processes performance conversations to request specific actions and results and closure conversations to complete work and give people a sense of accomplishment They identify the specific elements that make each of these conversations successful and show how they can be put together in different ways to achieve different objectives The Four Conversations demonstrates how to use the right conversation at the right time planning and starting each one well and finishing every conversation effectively to produce the results we want and the improved productivity our organizations need And through dozens of personal stories and sample dialogues the authors illustrate how real people in real situations have used the four conversations either alone or in combination to more effectively combat common workplace problems and lay the foundations for enduring success stronger relationships better buy in and a greater feeling of personal and professional achievement for everyone Integrated Management Systems Chad Kymal,Gregory Gruska,R. Devine,Suzanne M. Spencer-Wood,2024-04-12 The study of childhood in historical archaeology enriches interpretations of

the past but also has the potential for contributing to the understanding of methodological and theoretical issues in archaeology Archaeologically children are understudied relative to both their demographic and social importance partly because children are viewed as difficult to discern in the archaeological record Historical archaeology with its access to historical documents to supplement and illuminate archaeological evidence provides an opportunity to gain a greater understanding of the ways children s daily lives in the past were expressed in historically changing types and patterns of material culture Recent research presented in this volume contributes valuable perspectives for conceptualizing the historically changing social nature of childhood and methods for illuminating the roles of children Case studies are designed to illustrate methodological and theoretical advances in the historical archaeology of materialized experiences discourses identities places and their meanings associated with parenting and childhood The volume is organized into three sections devoted to case studies about 1 how childhood and parenting have been socially constructed cross culturally and temporally 2 social ideologies of childhood in contested spaces and 3 the relationship between children s experiences and adult expectations of childhood Each chapter demonstrates advances in current methods or theories used in the archaeology of childhood A final discussant drawn from the broader field of research on the archaeology of childhood provides a commentary on the ways the perspectives provided in the volume can be employed by researchers outside the sub discipline of historical archaeology
