Ahmed,2023-12-05 This book integrates elements from agency theory and signalling theory and draws upon recent changes in the Australian payout policy and incentives pay for risk averse employees to provide theoretical and empirical analyses that explain the paradox of the popularity of on market stock buyback activities in a market environment characterised by reasonably high share prices The authors utilise a dynamic model that rationalises this paradox which is divided into three components The first component predicts that executives may be conducting on market stock buyback programmes SBPs to adjust equity based remuneration for risk averse employees thereby motivating their performance without granting them additional costly equity incentive plans EIPs the second component predicts that companies are likely to invest in SBPs to increase the ownership stakes of employees in the firm thereby inducing risk averse employees to increase their productivity which increases firm value while the third component predicts that shareholders would benefit from incentives induced buybacks if a firm s opportunity cost of funds spent on buybacks is less than its inverse price to earnings ratio The authors findings highlight differences in the market responses towards announced repurchase motives implying that not all incentives induced buybacks are value destructive buybacks Specifically the widespread assumption that SBPs stifle investments in human and capital stock may be subjective as the findings show that incentives induced buybacks may be value creative or value destructive depending on share repurchase motives of SBPs This book will be a useful guide for scholars and researchers of finance corporate finance financial economics and financial accounting *Neo-nationalism and Universities* John Aubrey Douglass,2021-09-07 This book offers the first significant examination of the rise of neo nationalism and its impact on the missions activities behaviors and productivity of leading national universities This book also presents the first major comparative exploration of the role of national politics and norms in shaping the role of universities in nation states and vice versa and discusses when universities are societal leaders or followers in promoting a civil society facilitating talent mobility in researching challenging social problems or in reinforcing and supporting an existing social and political order **Medical Directory** ,1870 A listing of medical practitioners registered with the General Medical Council Includes England Scotland Wales and Northern Ireland Data includes name address degrees colleges appointment memberships and publications Also contains information on United Kingdom hospitals NHS trusts and boards of health The Turks Hasan Celâl Güzel,Cem Oğuz,Osman Karatay,2002
