

16. Virat and Mithali eat rice and drink milk in exactly the same quantities. The price of rice falls. In response, Virat increases the amount of milk but decreases the amount of rice he consumes. Mithali, on the other hand, increases both rice and milk consumption. Both Virat and Mithali spend all their income on eating rice or drinking milk. For Virat's behaviour to be consistent with standard, well-behaved indifference curves, his preferences over rice consumption imply that for him, rice must be a:
- (A) Inferior good
 - (B) Giffen good
 - (C) Luxury good
 - (D) Normal good
17. If the short-run IS-LM equilibrium occurs at a level of income above the natural rate of output, in the long run output will return to the natural rate via
- (A) an increase in the price level
 - (B) a decrease in the interest rate
 - (C) an increase in the money supply
 - (D) a downward shift of the consumption function
18. If the short-run aggregate supply curve is steep, the Phillips curve will be:
- (A) flat
 - (B) steep
 - (C) backward-bending
 - (D) unrelated to the slope of the short-run aggregate supply curve
19. There are no capital controls between the US and the UK. If the interest rate is higher in the US than in the UK, then we can conclude that
- (A) The US dollar is expected to appreciate with respect to the pound (the UK's currency)
 - (B) The pound is expected to appreciate with respect to the US dollar

McCaulay's College Entrance Exam Math for Mathematically Challenged Students Philip Martin

McCaulay, 2012-03-10 McCaulay's College Entrance Exam Math for Mathematically Challenged Students contains relatively easy sample questions of the type that are most likely to appear in the mathematics sections of college entrance exams designed to measure the mathematical skills students have typically acquired in courses taken by the end of 12th grade. These practice questions will help improve scores on the Preliminary SAT National Merit Scholarship Qualifying Test (PSAT/NMSQT), the SAT, and the ACT Mathematics Test with a goal of helping students achieve at least the minimum scores required for college admission. The categories of questions include Number and Operations, Algebra and Functions, Plane Euclidean Geometry, and Measurement/Coordinate Geometry/Three-Dimensional Geometry/Data Analysis/Statistics and Probability. These are only the most basic level questions. PSAT/NMSQT is a trademark registered by the College Board, and the National Merit Scholarship Corporation. SAT is a trademark registered by the College Board, and ACT is a trademark registered by ACT, Inc., which were not involved in the production of and do not endorse this product. **Cracking the Thinking Skills**

Assessment Mitesh Girish Desai, 2014-08-24 Oxford and Cambridge now require students to complete an exam called the Thinking Skills Assessment (TSA) before they invite them for interview. This exam forms a large part of their assessment of candidates prior to meeting them. Good TSA scores can sometimes lead to interviews despite poor results in public exams, and a poor TSA score has been known to lead to rejection of a candidate before interview despite flawless public exam scores. This textbook is designed to help students improve their performance in the TSA through a number of methods: 1. Exam Strategy: This exam is unlike any exam most candidates will have ever faced. The textbook arms students with simple but extremely effective strategies designed to save candidates time and also to use the nature of the exam to guide them towards more correct answers. 2. Approach: The textbook also shows candidates simple approaches to the unique style of question presented in the TSA. It helps candidates get comfortable and confident with the questions the TSA requires candidates to complete. 3. Practice: With 130 practice questions which are all designed in a similar way to the questions on the TSA exam, along with numerous worked examples, candidates will go into the exam having more experience of the questions. There is also a comprehensive explained answer section so candidates can check their answers and also see different methods to evaluate the questions and get to the correct answer more often faster.
