National Smart Water Grid Ronald A. Beaulieu, Jeff Everitt, Diana Dehm, 2010 The United States repeatedly experiences floods along the Midwest's large rivers and droughts in the arid Western States that cause traumatic environmental disasters with huge economic impact These problems can be alleviated with an integrated approach and comprehensive solution Withdrawing flood water from the Mississippi River and its tributaries will mitigate the damage of flooding and provide a new resource of fresh water to the Western States The existence of a trend of increasing heavy precipitation and flooding on the

Midwest s Rivers is supported by a growing body of scientific literature that documents the effects of climate change since 1993 Flooding in Iowa North Dakota Tennessee Arkansas and along the Mississippi River from 1993 to 2010 are prime examples The Colorado River Basin and the western states are experiencing a protracted multi year drought Fresh water can be pumped via pipelines and aqueducts from areas of overabundance flood to areas of drought or high demand Calculations document 10 to 60 million acre feet maf of fresh water per flood event can be captured from the Midwest s Rivers and pumped via pipelines to the Colorado River and introduced upstream of Lake Powell Utah also to destinations near Denver Colorado and used in areas along the new water transportation routes Water users of the Colorado River include the cities in southern Nevada southern California northern Arizona Colorado Utah Indian Tribes and Mexico The proposed starting end points and routes of the water transportation routes are documented including information on right of ways necessary for state and federal permits The National Smart Water Grid NSWG could create a million new jobs for construction operation and maintenance and save billions per year in drought and flood damage reparations tax dollars The socio economic benefits include decreased flooding in the Midwest increased agriculture and recreation and tourism improved national security transportation and fishery and wildlife habitats decreased salinity in Colorado River water crossing the US Mexico border and decreased eutrophication hypoxia excessive plant growth and decay in the Gulf of Mexico to name a few The sale of captured flood water could pay for the National Smart Water Grid The cost benefit analysis indicates that the NSWG should be net beneficial A detailed feasibility studies for each pipeline aqueduct transportation route is warranted The Second Edition expands flooding and recent climate change data emphasis on cost benefit analysis details on the engineered features such as pipes pumps aqueducts and patent pending modified levees Water is a 400 billion industry the third largest behind oil and electricity The U S has a Strategic Petroleum Reserve and needs a comparable Strategic Water Reserve The National Smart Water Grid could become a Strategic Water Reserve and augment the National Energy Grid The availability and sustainability of freshwater is the most important issue facing humanity in this century

Whispering the Strategies of Language: An Mental Journey through **Air Masses And Cyclones Answer Key**

In a digitally-driven world wherever displays reign great and immediate transmission drowns out the subtleties of language, the profound secrets and emotional nuances hidden within words usually go unheard. However, nestled within the pages of **Air Masses And Cyclones Answer Key** a fascinating literary value pulsing with natural thoughts, lies an exceptional quest waiting to be undertaken. Penned by a skilled wordsmith, that wonderful opus attracts viewers on an introspective journey, gently unraveling the veiled truths and profound influence resonating within ab muscles cloth of each word. Within the psychological depths of the poignant evaluation, we will embark upon a sincere exploration of the book is primary themes, dissect its captivating writing model, and yield to the effective resonance it evokes strong within the recesses of readers hearts.
