Teaching and Researching ELLs' Disciplinary Literacies Meg Gebhard, 2019-02-18. Written from a critical perspective, this volume provides teachers, teacher educators, and classroom researchers with a conceptual framework and practical methods for teaching and researching the disciplinary literacy development of English language learners (ELLs). Grounded in a nuanced critique of current social, economic, and political changes shaping public education, Gebhard offers a comprehensive framework for designing curriculum, instruction, and assessments that build on students' linguistic and cultural resources and that are aligned with high-stakes state and national standards using the tools of systemic functional linguistics (SFL). By providing concrete examples of how teachers have used SFL in their work with students in urban schools, this book provides pre-service and in-service teachers as well as literacy researchers and policy makers with new insights into how they can support the disciplinary literacy development of ELLs and the professional practices of their teachers in the context of current school reforms. Key features of this book include the voices of teachers, examples of curriculum, sample analyses of student writing, and guiding questions to support readers in conducting action-oriented research in the schools where they work.

Teaching Towards Green Schools Linda H. Plevyak, 2022-07-04. This engaging and timely book showcases practical ways that PreK-12 teachers and school leaders can create and implement sustainability-focused projects and practices in their classrooms and schools, helping promote a healthy, sustainable environment and curriculum for students and leading the way towards becoming a green school. Sharing real-world case studies and detailed walk-throughs of sustainable schools in action, from Madison, Alabama to Bali, Indonesia, author Linda H. Plevyak lays out the benefits, principles, and practices of creating a sustainable school, from beginner classroom projects like creating a garden, recycling, and composting to more complex and school-wide initiatives like energy audits, creating an environmental management system, engaging with policy, and building and leveraging community partnerships. Plevyak highlights sustainable practices that can be developed with little to no budget and focuses on those that support the development of critical thinking skills, promote project-based learning, and consider the environment as a learning tool, incorporating sustainability as a natural progression of the learning process. The book outlines extensive resources teachers and schools can use to embed sustainability in their programs and curriculum, offering teachers, school leaders, and policy makers the tools they need to provide this generation of students with the knowledge and skills to create a more sustainable world.
