Democracy, Multiculturalism, and the Community College Robert A. Rhoads,James R. Valadez,2016-05-06 Based on five organizational case studies this book argues that community colleges face an identity crisis and must find ways of balancing the three traditional roles typically assumed by them transfer vocational and community education To emphasize one at the expense of another is to fail to meet the diverse needs of students who look to the community college as a source of opportunity and social mobility In addition community colleges must create an organizational context in which opportunities exist for culturally diverse students to participate as full members in the educational process The study uses democratic educational strategies first suggested by John Dewey as a foundation for developing a critical multicultural view of community college education The authors argue that critical multiculturalism moves beyond liberal views of cultural diversity and challenge academic institutions to take advantage of the varied experiences and perspectives that students from other cultures bring to education The book includes a reference section following the final chapter and a name and subject index

Gender and Fair Assessment Warren W. Willingham, Nancy S. Cole, 2013-12-16 There have been many important changes in the participation of women and men in American society over the past quarter century Tests play a role in those changes by providing evidence of the diverse achievement and proficiency of women and men They aid the learning process and reflect inequalities in opportunity to learn and participate In addition they provide useful information in considering what alternatives in education and work make most sense for individuals and influence views about groups of students educational programs and a wide range of issues For all of these reasons it is important that tests assess fairly and reflect accurately the ways young people are and are not achieving as well as desired The test performance of women and men is a research topic of historical interest and has received much attention in recent years Because of this increased interest there is a great deal of new research and data available The purpose of the study presented in this volume was to review this new information with two objectives in mind to clarify patterns of gender difference and similarity in test performance and related achievements and to see what implications those findings might have for fair assessment and as a corollary examine the assessment process as a possible source of gender differences This study is interested in tests used in education to assess developed knowledge and skill In order to gain a broader view of gender similarity and difference the contributors looked at other types of measures and other characteristics of young women and men Their hope is to contribute to a firmer basis for insuring fairness in tests an objective which is particularly important as the field moves increasingly to new forms of assessment in which there is less experience
