amendment of the European Regulation EC No 216 2008 by the new Regulation EC No 1108 2009 into force since 14 December 2009 the area of competency of the European Aviation Safety Agency EASA is progressively extended towards a total system approach including ATM ANS as well as airport safety and interoperability This new regulation allows airport operators to continue with providing apron management service but they have to declare their capability for offering this service within the certification process of the aerodrome An advanced surface movement guidance and control system is one important tool for providing this service at large and complex airports With the implementation of an advanced surface movement guidance and control system A SMGCS the airport contributes to the precise surface guidance of aircraft to and from a runway while maintaining safe distance to each other as well as to obstacles and vehicles The system is aimed to assist the ground controllers in managing the traffic situation on the movement area in all weather conditions Due to advanced surveillance technology the ground movement controllers are able to continue operations with an A SMGCS even in low visibility conditions e g due to fog and maintaining nearly the same capacity as with no visibility restrictions The focus of this master thesis is not on the operational and technical details of the system which are profoundly analyzed and elaborated on by R D projects e g by the German Aerospace Center DLR European research projects and the industry However the second chapter will provide those details required to fully understand the legal and administrative aspects of an A SMGCS If ANSP are using a system like A SMGCS under safety aspects they have to undergo a licensing process according to SES regulations and are licenced by the national supervisory authority The airport itself is licenced by the appropriate approving authority of the federal state For Germany s biggest airport Frankfurt International Airport it s the ministry of transport of Hesse the HMWVL This ministry licences the airport as such as well as the safe provision of apron management service including the use of procedures and technical systems like A SMGCS The conditions for this approval are subject of the Master s Thesis
