Frontier Fictions Firoozeh Kashani-Sabet, 2014-08-07 In *Frontier Fictions* Firoozeh Kashani Sabet looks at the efforts of Iranians to defend if not expand their borders in the nineteenth and early twentieth centuries and explores how their conceptions of national geography influenced cultural and political change The frontier fictions or the ways in which the Iranians viewed their often fluctuating borders and the conflicts surrounding them played a dominant role in defining the nation On these borderlands new ideas of citizenship and nationality were unleashed refining older ideas of ethnicity Kashani Sabet maintains that land based conceptions of countries existed before the advent of the modern nation state Her focus on geography enables her to explore and document fully a wide range of aspects of modern citizenship in Iran including love of homeland the hegemony of the Persian language and widespread interest in archaeology travel and map making While many historians have focused on the concept of the imagined community in their explanations of the rise of nationalism Kashani Sabet is able to complement this perspective with a very tangible explanation of what connects people to a specific place Her approach is intended to enrich our understanding not only of Iranian nationalism but also of nationalism everywhere C++

Gregory Satir, Doug Brown, 1995 A primer for C programmers transitioning to C and designed to get users up to speed quickly this book tells users just what they need to learn first Covering a subset of the features of C the user can actually use this subset to get familiar with the basics of the language The book includes sidebars that give overviews of advanced features not covered

Rare Earth Frontiers Julie M. Klinger, 2018-01-15 *Rare Earth Frontiers* is a timely text As Klinger notes rare earths are neither rare nor technically earths but they are still widely believed to be both Although her approach focuses on the human or cultural geography of rare earths mining she does not ignore the geological occurrence of these mineral types both on Earth and on the moon This volume is excellently organized insightfully written and extensively sourced Choice Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation *Rare Earth Frontiers* is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use

rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon *Advances in Smart Technologies in Structural Engineering* Jan Holnicki-Szulc, C. A. Mota Soares, 2013-03-09 This book collects invited lectures presented and discussed on the AMAS ECCOMAS Workshop Thematic Conference SMART 03 The SMART 03 Conference on Smart Materials and Structures was held in a 19th century palace in Jadwisin near Warsaw 25 September 2003 Poland It was organized by the Advanced Materials and Structures AMAS Centre of Excellence at the Institute of Fundamental Technological Research IFTR in Warsaw ECCOMAS European Community on Computational Methods in Applied Sciences and SMART TECH Centre at IFTR The idea of the workshop was to bring together and consolidate the community of Smart Materials and Structures in Europe The workshop was attended by 66 participants from n European countries Austria Belgium Finland France Germany Italy Poland Portugal Spain U K Ukraine 1 participant from Israel and 1 participant from the USA The workshop program was grouped into the following major topics 4 sessions on Structural Control 18 presentations 3 sessions on Vibration Control and Dynamics 14 presentations 2 sessions on Damage Identification 10 presentations 2 sessions on Smart Materials 9 presentations Each session was composed of an invited lecture and some contributed papers Every paper scheduled in the program was presented so altogether 51 presentations were given No sessions were run in parallel The workshop was attended not only by researchers but also by people closely related to the industry There were interesting discussions on scientific merits of the presented papers as well as on future development of the field and its possible industrial applications
