
AICE marine science AS Level Exam Review paper 1, 2 (2024) Questions With Complete Solutions!!!

scientific method Answer - 1. for valid experiments, data should be collected numerous times (the more times, the more accurate)
2. only one variable (independent) should be changed in an experiment. All others should be controlled. The dependent variable is dependent upon what you changed-it will be what you are measuring in an experiment
3. quantitative results- numbers (qualitative=descriptive words)

outlining/designing an experiment Answer - -state amount of containers e.g. 5 tanks of each

- state constants (at minimum 3) (light, salinity, amount of water, how often results are calculated, amount of exposure/days etc.)
- what is the amount of independent variables used? pick a quantity suitable for the experiment appropriate to the experiment
- state the duration of the entire experiment
- state the calculating results. most common is simple counting
- state repeat experimentation and calculate mean/average from all trials

describing results of an experiment Answer - -state the most with reference to data

- state the least with reference to data
- manipulate data by finding range

creating or working with graphs Answer - -use the entire graph

- correctly label the x and y axis
- use correct intervals. do not use breaks to begin at certain number. each interval is equally spaced. use appropriate scale the divide the total number of spaces on the graph by the range. this will give you your interval.
- when constructing a graph, make sure your scale is appropriate to show a relationship-you may need to have values on the axis to the left and to the right
- plot all points correctly
- line of best fit

explain what would be needed to turn an experiment into a theory Answer - -rigorous testing

- repeated testing by many/other scientist
- scientist get similar results but with the same conclusions no exception
