

## Difference Between ECM and PCM

- + In many companies, the change management process is split into to distinct processes
  - Engineering Change Management (ECM)
  - Production Change Management (PCM)
- + The ECM process is usually all of the activities from initiation of change up until the release of engineering data to various groups
  - Requesting the change
  - Doing an analysis of the change
  - Approving it
  - Making updates to drawings, BOMs, specifications, etc.
  - Completing a final review
  - Releasing data from the engineering group
- + Data is often “thrown over the wall” to ancillary groups (manufacturing, purchasing, etc.) to implement the change
- + Downside – not efficient due to other groups were not involved in the change during the engineering process (surprise!)
