

Air Pollution Essay

Essay on Air Pollution

Environmental changes are caused by the natural or artificial content of harmful pollutants and can cause instability, disturbance, or adverse effects on the ecosystem. Earth and its environment pose a more serious threat due to the increasing pollution of air, water, and soil. Environmental damage is caused by improper resource management or careless human activities. Therefore, any activity that violates the original nature of the environment and leads to degradation is called pollution. We need to understand the origin of these pollutants and find ways to control pollution. This can also be done by raising awareness of the effects of pollutants.

Air pollution is any physical, chemical, or biological change in the air. A certain percentage of the gas is present in the atmosphere. Increasing or decreasing the composition of these gasses is detrimental to survival. This imbalance in gas composition causes an increase in global temperature which is called global warming.

Energy Metropolis Martin V. Melosi, Joseph A. Pratt, 2007-07-01 Houston's meteoric rise from a bayou trading post to the world's leading oil

supplier owes much to its geography geology and climate the large natural port of Galveston Bay the lush subtropical vegetation the abundance of natural resources But the attributes that have made it attractive for industry energy and urban development have also made it particularly susceptible to a variety of environmental problems Energy Metropolis presents a comprehensive history of the development of Houston examining the factors that have facilitated unprecedented growth and the environmental cost of that development The landmark Spindletop strike of 1901 made inexpensive high grade Texas oil the fuel of choice for ships industry and the infant automobile industry Literally overnight oil wells sprang up around Houston In 1914 the opening of the Houston Ship Channel connected the city to the Gulf of Mexico and international trade markets Oil refineries sprouted up and down the channel and the petroleum products industry exploded By the 1920s Houston also became a leading producer of natural gas and the economic opportunities and ancillary industries created by the new energy trade led to a population boom By the end of the twentieth century Houston had become the fourth largest city in America Houston s expansion came at a price however Air water and land pollution reached hazardous levels as legislators turned a blind eye Frequent flooding of altered waterways deforestation hurricanes the energy demands of an air conditioned lifestyle increased automobile traffic exponential population growth and an ever expanding metropolitan area all escalated the need for massive infrastructure improvements The experts in Energy Metropolis examine the steps Houston has taken to overcome laissez faire politics indiscriminate expansion and infrastructural overload What emerges is a profound analysis of the environmental consequences of large scale energy production and unchecked growth

Workshop on Review and Assessment of European Air Pollution Policies A (NA),2005 The development of European policies on air pollution prevention is currently in an intensive phase The European Commission Clean Air for Europe CAFE programme is preparing an air pollution strategy and the Convention on Long range Air Pollution may start a review of the Gothenburg Protocol during 2005 On the 25th 27th of October 2004 a workshop on review and assessment of the scientific basis and tools employed in this policy work was held to provide guidance to the policy development Future needs of scientific support in a longer perspective were also discussed A large part of the workshop was focussed on the role of airborne particles Human health effects caused by exposure to airborne particles have received increasing attention in recent years and concerns of health effects are today the main driving force for air pollution prevention and research In addition to this new concepts for describing effects of acidification and ozone are being introduced providing more accurate and relevant descriptions of ecosystem effects to changes in air pollution levels The needs for considering air pollution on a hemispheric scale were also highlighted This workshop was organised by the ASTA programme the Swedish research programme on air pollution in co operation with the Nordic Council of Ministers the EU CAFE programme and CLRTAP
