Air Terra Harmony:

An Encounter with Diex Vinayak Singh Oberoi ,2024-03-08 *An Encounter with Diex* is one of the best short stories I have read in a long time It begins with the fear anxiety and pressure so common among students these days Vinayak is also an average student but he puts up a brave fight to perform and live up to the expectations of his teachers and guardians One day in a feverish delirium he gets into a dream experience But was it really a dream Vinayak portrays a world of light magic miracles and astral beings as he perchance dives into a portal of the unknown There he meets Guardians of the divine order sitting under the Luminous Sentinel tree They tell him that he is the chosen one for he is special He has a special mission to fulfill to counteract the negative forces called the Eclipse Shadow The fight that our average hero puts up is by no means average And the creative skill of the young author is excellent as he describes how Vinayak had to face the Crystal Caverns a labyrinthine network of tunnels filled with shimmering crystals The author is mature enough to describe how the Crystals actually reflect the demons of one own fear and follies The names he created for the characters like Dreadfiend and Netherclaw touched my heart owing to their simple yet magnificent imagery The author is obviously worried about his skills in Mathematics and it all started at that From that point of concern common to most students he takes a flight to a magical world of strength courage success and confidence When he finally emerges from his dream he is a changed person a successful mathematician One might say okay so he is a dreamer how can he perform something as rational and exacting as Mathematics But psychology says our cognitive capacity is unlimited Our brains and minds can be trained to work in a certain way due to neuroplasticity The powers of the mind are tremendous and how feats can be accomplished by subconscious conditioning of it is a matter of deep research in neuroscience The only requisition is the honest desire aspiration and executive strength The author seems to have accomplished something of that nature autosuggestion into the subconscious in order to tap the treasure house of resources that lie dormant in those psychical recesses But he must have done it unknowingly it is my reading of the story that prompts me to analyze it in this way His entire experience happened in a dream rather when he was in a very drowsy state due to his fever But his *raison d'être* as a student remained an indelible part of his relentless efforts It is possible that he reconditioned his neuronal wirings of weakness into strengths failures into success of grief into joy This is precisely what psychoanalysts and hypnotherapists aim to accomplish in their patients I strongly recommend this book to all readers school children especially I believe every child is unique and gifted It is unfair to brand a child as average We as parents and teachers should encourage our children rekindle that fire in them instead of gagging and smothering their delicate souls One only needs to find out his her passion It will open paths of strength and light rays of hope in young minds It is truly a delightful piece of writing
