Systems Maintainability J. Knezevic, 1997-07-31 Maintainability is of crucial importance throughout industry and is established as one of the most important issues in the aerospace and defence arena. No new system can be introduced without full maintainability analysis and demonstration, a type of analysis which reduces life cycle costs by decreasing operational and maintenance costs and increasing systems operational effectiveness, leading in turn to the creation of more competitive products. This book establishes the full methodology for maintainability mathematics and modelling, as well as the relationship between the maintainability and maintenance processes.

Aerospace Marketing Management Philippe Malaval, Christophe Bénaroya, Jonathan Aflalo, 2013-11-12 This book presents an overall picture of both B2B and B2C marketing strategies, concepts and tools in the aeronautics sector. This is a significant update to an earlier book successfully published in the nineties which was released in Europe, China and the USA. It addresses the most recent trends such as Social Marketing and the internet, Customer Orientation, Project Marketing and Concurrent Engineering, Coopetition and Extended Enterprise. *Aerospace Marketing Management* is the first marketing handbook richly illustrated with executive and expert inputs, as well as examples from parts suppliers, aircraft builders, airlines, helicopter manufacturers, aeronautics service providers, airports, defence and military companies and industrial integrators, tier 1, tier 2. This book is designed as a ready reference for professionals and graduates from both Engineering and Business Schools.

Generative Systems and Intelligent Tutoring Systems Sabine Graf, Angelos Markos, 2025-07-28 This book constitutes the refereed proceedings of the 21st International Conference on Intelligent Tutoring Systems (ITS 2025) held in Alexandroupolis, Greece, during June 2-6, 2025. The 21 full papers, 27 short papers and 5 posters included in this book were carefully reviewed and selected from 67 submissions. The papers are organized in the following topical conference tracks: Part I: Generative Tutoring Systems. The goal of this part is to show how new techniques inspired by artificial intelligence (AI) and new methods in education can improve learning, teaching and generate the capacity for knowledge acquisition and much more. Part II: Application areas, environments and techniques for AI systems. This part shows the progress of research investigating the different application areas such as education, health, techniques such as neural networks, data mining, natural language processing and environments such as games, virtual reality, cognitive robots for effective AI systems.
