Sensor Technology Handbook Jon S. Wilson, 2004-12-21 Without sensors most electronic applications would not exist they perform a vital function namely providing an interface to the real world The importance of sensors however contrasts with the limited information available on them Today's smart sensors wireless sensors and microtechnologies are revolutionizing sensor design and applications This volume is a comprehensive sensor reference guide to be used by engineers and scientists in industry research and academia to help with their sensor selection and system design It is filled with hard to find information contributed by noted engineers and companies working in the field today The book offers guidance on selecting specifying and using the optimum sensor for any given application The editor in chief Jon Wilson has years of experience in the sensor industry and leads workshops and seminars on sensor related topics In addition to background information on sensor technology measurement and data acquisition the handbook provides detailed information on each type of sensor technology covering technology fundamentals sensor types w advantages disadvantages manufacturers selecting and specifying sensors applicable standards w urls of related web sites interfacing information with hardware and software info design techniques and tips with design

examples latest and future developments The handbook also contains information on the latest MEMS and nanotechnology sensor applications Jam packed with over 800 pages of techniques and tips detailed design examples standards hardware and software interfacing information and manufacturer pros cons to help make the best sensor selection for any design Covers sensors from A to Z from basic technological fundamentals to cutting edge info on the latest MEMS and the hottest nanotechnology applications

Strategic Pricing and Management Accounting David Dugdale, 2022-11-11 Management accountants should have a key role to play in developing and executing pricing strategy and policy However their historical focus on costing and operations means that their potential as business partners with marketing and sales professionals is easily overlooked This book focuses on how management accountants can help key stakeholders in the formulation and execution of pricing policy and conversely on showing managers responsible for pricing decisions how they could be helped by management accountants It equips management accountants with a unique overview of pricing theory the practical quantitative techniques they should know and the value they can bring to the pricing function The book analyses segmentation value to customer price value maps segmental pricing product differentiation and dynamic pricing with traditional economic theory showing how these ideas have implications for management accountants and the value that they can bring to the business Differences in customer value have been integral to economic theory for decades and price discrimination the technique of charging different prices to different customers for the same or similar goods is well established This observation provides the central core of this book The methods of price discrimination are set out in detail showing how management accountants can bring their analytical skills to bear in helping executives and pricing professionals take advantage of differences in customer valuation to improve profits The book provides a thorough overview of the field and offers a good introduction for researchers and students Equally the book shows managers marketers and pricing professionals how management accountants can assist them in delivering better pricing practice

Smart Intelligent Aircraft Structures (SARISTU) Piet Christof Wölcken, Michael Papadopoulos, 2015-09-04 The book includes the research papers presented in the final conference of the EU funded SARISTU Smart Intelligent Aircraft Structures project held at Moscow Russia between 19-21 of May 2015 The SARISTU project which was launched in September 2011 developed and tested a variety of individual applications as well as their combinations With a strong focus on actual physical integration and subsequent material and structural testing SARISTU has been responsible for important progress on the route to industrialization of structure integrated functionalities such as Conformal Morphing Structural Health Monitoring and Nanocomposites The gap and edge free deformation of aerodynamic surfaces known as conformal morphing has gained previously unrealized capabilities such as inherent de-icing erosion protection and lightning strike protection while at the same time the technological risk has been greatly reduced Individual structural health monitoring techniques can now be applied at the part manufacturing level rather than via extending an aircraft's time in the final assembly line And

nanocomposites no longer lose their improved properties when trying to upscale from neat resin testing to full laminate testing at element level As such this book familiarizes the reader with the most significant developments achievements and key technological steps which have been made possible through the four year long cooperation of 64 leading entities from 16 different countries with the financial support of the European Commission
