

10.1 Functions

Students use definitions of a function. They discuss that, according to the definition, a function is a set of ordered pairs, where each element of the domain is paired with exactly one element of the codomain.

Students learn to represent a function in three ways: as a set of ordered pairs, as a graph, and as a mapping diagram. They learn that a function is a set of ordered pairs, where each element of the domain is paired with exactly one element of the codomain.
