- 1 As a diver swims deeper underwater, the water pressure in pounds per square inch (PSI) increases on the diver. The table below shows the pressure in PSI for several depths of water.

WATER PRESSURE:

Depth (in feet)	Pressure (in PSI)
10	4.3
20	8.6
30	12.9
40	17.2
50	21.5

Which equation represents p , the water pressure in square inches, as a function of d , the depth in feet?

Ⓐ $p = 4.3d$

Ⓒ $p = 23.3d$

Ⓑ $p = 0.43d$

Ⓓ $p = 2.33d$

- 2 For one child, a childcare facility charges \$300 per month for preschool and \$3.50 per hour for each hour of childcare after preschool. The function below can be used to determine $f(h)$, the monthly fee for childcare and preschool, where h represents the number of hours spent in childcare after preschool.

$$f(h) = 300 + 3.5h$$

If the one-month charges for one child totaled \$637.75, what was the total number of hours the child spent in childcare after preschool?

D. Rivera, 2015-06-17 This is a methods book for preservice middle level majors and beginning middle school teachers It takes a very practical approach to

learning to teach middle school mathematics in an emerging Age of the Common Core State Standards The Common Core State Standards in Mathematics CCSSM is not meant to be the official mathematics curriculum it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the Grade 5 through Grade 8 and traditional pathway Algebra I portions of the CCSSM first with issues in content practice assessment learning teaching and classroom management pursued next and in that order In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content practice learning teaching and assessment The Common Core state content standards which pertain to mathematical knowledge skills and applications have been carefully crafted so that they are teachable learnable coherent fewer clearer and higher The practice standards which refer to institutionally valued mathematical actions processes and habits have been conceptualized in ways that will hopefully encourage all middle school students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation Thus in the CCSSM proficiency in content alone is not sufficient and so does practice without content which is limited Content and practice are both equally important and thus must come together in teaching learning and assessment in order to support authentic mathematical understanding This blended multisourced text is a getting smart book It prepares preservice middle level majors and beginning middle school teachers to work within the realities of accountable pedagogy and to develop a proactive disposition that is capable of supporting all middle school students in order for them to experience growth in mathematical understanding that is necessary for high school and beyond including future careers **Automatic Item**

Generation Mark J. Gierl, Thomas M. Haladyna, 2013 Automatic item generation AIG represents a relatively new and unique research area where specific cognitive and psychometric theories are applied to test construction practices for the purpose of producing test items using technology The purpose of this book is to bring researchers and practitioners up to date on the growing body of research on AIG by organizing in one volume what is currently known about this research area Part I begins with an overview of the concepts and topics necessary for understanding AIG by focusing on both its history and current applications Part II presents two theoretical frameworks and practical applications of these frameworks in the production of item generation Part III summarizes the psychological and substantive characteristics of generated items Part IV concludes with a discussion of the statistical models that can be used to estimate the item characteristics of generated items features one future application of AIG describes the current technologies used for AIG and also highlights the unresolved issues that must be addressed as AIG continues to mature as a research area Comprehensive The book provides a comprehensive analysis of both the theoretical concepts that define automatic item generation and the practical considerations required to implement these concepts Varied Applications Readers are provided with novel applications in diverse content areas e g

Resources in education ,1991 Algebraic System Specification and Development Michel Bidoit,1991-06-26 Methods for
the algebraic specification of abstract data types were proposed in the early 1970s in the USA and Canada and became a
major research issue in Europe shortly afterwards Since then the algebraic approach has come to play a central role in
research on formal specification and development as its range of applications was extended to the specification of complete
software systems to the formal description of the program development process and to the uniform definition of syntax and
semantics of programming languages Today this approach extends beyond just software to the development of integrated
hardware and software systems These flourishing activities in the area of algebraic specifications have led to an abundance
of approaches theories and concepts which have universal algebra category theory and logic as a common mathematical
basis This volume is an annotated bibliography which provides an up to date overview of past and present work on algebraic
specification No attempt is made to provide a coherent introduction to the topic for beginners the intention is rather to
provide a guide to the current literature for researchers in algebraic specification and neighboring fields Some indications of
how the different approaches are related are included together with some ideas concerning possible future directions
