Algebra Eoc 2014:

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Public Policy and Higher Education Nathan J. Daun-Barnett, Edward P. St. John, 2024-11-15 Public Policy and Higher Education third edition provides readers with the tools to examine how policies affect students access and success in college Rather than arguing for a single approach the authors use research based evidence and consider political and historical values and beliefs to examine how

policymakers and higher education administrators can inform and influence change within systems of higher education. Raising new questions and examining recent developments, this fully updated edition is an invaluable resource for graduate students, administrators, policymakers, and researchers who seek to learn more about the crucial contexts underlying policy decisions and college access. This third edition includes updates across the board to reflect current policy contexts. Expanded historical frameworks allow readers to better understand the preparation, access, persistence, and the development of state education systems. New considerations of state and national political ideologies help to inform contemporary contexts. Finally, refreshed cases, including an additional case about Florida and updated cases for California, Minnesota, Indiana, and North Carolina, equip readers with new ways to analyze complex state policies and their impact on higher education.

Special Features: Case Studies help readers to build their skills in analyzing how political values, beliefs, and traditions influence policy decisions and adaptations within state systems. Reflective Questions encourage readers to discuss state and campus contexts for policy decisions and to consider the strategies used in a state or institution. Approachable Explanations unpack complex public policies and financial strategies for readers who seek an understanding of public policy in higher education. Research-Based Recommendations explore how policymakers, higher education administrators, and faculty can work together to improve quality, diversity, and financial stewardship.

International Perspectives on Writing Curricula and Development
 Jill Jeffery, Judy M. Parr, 2021-05-27. This book contributes to the innovation of writing education and research globally by providing crucial insights into how the structures and aims of literacy curricula vary internationally. It examines how nine education systems across five continents represent good writing in curricula that shape students' experiences learning to write in school. The book presents curricular analyses aimed at providing insight into how writing development can be better supported through innovative policy and research. The findings regarding international variation are presented under three broad dimensions: social and contextual factors that shape writing curricula; the discourses of writing reflected in curricula and official documents; and hallmarks of classroom practice, including the relationship with official discourse. Case study chapters present integrated inductive and deductive document analyses, findings of which are compared in a concluding cross-case analysis chapter. Offering a detailed comparative analysis of writing research, *International Perspectives on Writing Curricula and Development* will be of great interest to academics, researchers, and students in the fields of education, literacy, and curriculum studies. It will also be relevant reading for policymakers and curriculum designers. Chapters 1, 7, 9, 10, and 11 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution-NonCommercial-NoDerivatives (CC BY-NC-ND) 4.0 license.
