Research in Education ,1969-05 Children and Youth in Africa Ntarangwi, Mwenda, 2014-06-12 This annotated bibliography provides a summary of scholarly work on children and youth in Africa published between 2001 and 2011 It draws from journal articles monographs and book chapters This rich resource for scholars presents publications with a wide range of approaches to child and youth studies Some scholars question certain views of children especially when it comes to their own agency and full participation in socioeconomic production at the household level The idea that children are vulnerable social subjects is the predominant view that shaped much of the research reported on in this volume Western restrictions on specific age limits that govern children s participation in work or labour whether paid or not and the subsequent rights that go along with them are often not easily translatable to many African contexts This creates a kind of separation between African and Western scholars in their study and understanding of children The overwhelming focus of research published on HIV AIDS and orphans violence and child soldiers children s rights and street children demonstrates the continued interest regarding children as vulnerable and in need of adult protection Focusing on the vulnerability of children in Africa appears to be a result of the construction of childhood in terms of modern mostly Western perceptions which are based on chronological age mainly This book is very important for all scholars working on children and the youth in Africa
