This quiz will be primarily a reflection of how well I encourage you to think carefully about the questions, and will benefit your learning of the material and your preparation for the in-classroom discussion.

Question 1

1 point

Many do you think the profit margin for Anagene's cartridges has been fluctuating? Is there attributable to the actual number of cartridges sold or the change in the number of the existing system that are using the cartridge the most?

The actual number of cartridges sold has not changed. The company revised the estimated number of cartridges produced and revised the definition of the usage per unit. This led to the estimated number of cartridges change. Finally, company revenue is calculated as the number of quantity sold by multiplied production price per unit.
