**Design Thinking Pedagogy** Cara Wrigley, Genevieve Mosely, 2022-08-15

The problems facing society today are complex multifaceted and require crossing multiple disciplinary boundaries As such these problems call for interdisciplinary collaboration including new and different combinations of skills

and knowledge Currently tertiary education providers are not well positioned to develop these interdisciplinary capabilities at a rate commensurate with the speed of contemporary change This book places design thinking as the catalyst to create change in the tertiary education sector and to build interdisciplinary skill sets that are required for the graduate of the future By presenting a series of case studies and drawing on global experts in the field this book investigates pedagogical approaches disciplinary facilitation practice curriculum integration and a framework for understanding design thinking pedagogy within tertiary education Focusing on how educational institutions can produce innovative graduates with the ability to traverse disciplinary constraints this book will be essential reading for research students academics and industry practitioners

**Biodesign in high schools** Giovanna Danies Turano, María Paula Barón Aristizábal, Andrea Peralta Mejía, Andrea Forero Cañizares, Jenny Grillo Naranjo, 2023-07-18 Traditional education which is mainly based on evaluating theoretical content at the end of a course is not in keeping with the skillset we require in the twenty first century Today we need creative and innovative individuals who can think critically who are capable of learning to learn and who have complex problem solving skills We need people who can work collaboratively using transdisciplinary communication skills We need citizens who are aware of local needs but have a global vision They must make decisions not only based on their own well being but also in the best interests of the community and the planet They must understand that the solution requires a balance People can acquire these skills through design thinking which builds the learning process by carrying out projects and theorizes based on set challenges Biodesign for High Schools is a pedagogical proposal that combines scientific topics with a creative approach it offers a plethora of possibilities to prepare future high school graduates to respond to the needs of today s world
