

Enhancing Outcomes Experienced by Users of Upper Limb Prostheses

Several years ago, the Hanger Institute began collecting outcome measures from users with upper limb amputation and with receiving a limb after an amputation in their prosthetic rehabilitation. While well being and quality of life are primary measures of interest, additional measures include measures of daily participation, upper extremity function, and pain interference. Addressing the needs of our users is our primary focus, and we have been successful in doing so. Collectively, these efforts have allowed us to better serve our important stakeholders within the prosthetic community.

With your support, we can continue to improve the lives of our users.

Figure 1: Trends in the number of upper limb prostheses used by users over time.

The number of upper limb prostheses used by users over time has increased significantly, indicating a growing need for prosthetic devices.

This increase is likely due to a combination of factors, including improved prosthetic technology and increased awareness of the benefits of prosthetic devices.

Abel,2013-05-01 Changes in health care have dramatically altered the experience of dying in America At the turn of the twentieth century medicine s imperative to cure disease increasingly took priority over the demand to relieve pain and suffering at the end of life Filled with heartbreaking stories *The Inevitable Hour* demonstrates that professional attention and resources gradually were diverted from dying patients Emily K Abel challenges three myths about health care and dying in America First that medicine has always sought authority over death and dying second that medicine superseded the role of families and spirituality at the end of life and finally that only with the advent of the high tech hospital did an institutional death become dehumanized Abel shows that hospitals resisted accepting dying patients and often worked hard to move them elsewhere Poor terminally ill patients for example were shipped from Bellevue Hospital in open boats across the East River to Blackwell s Island where they died in hovels mostly without medical care Some terminal patients were not forced to leave yet long before the advent of feeding tubes and respirators dying in a hospital was a profoundly dehumanizing experience With technological advances passage of the Social Security Act and enactment of Medicare and Medicaid almshouses slowly disappeared and conditions for dying patients improved though as Abel argues the prejudices and approaches of the past are still with us The problems that plagued nineteenth century almshouses can be found in many nursing homes today where residents often receive substandard treatment A frank portrayal of the medical care of dying people past and present *The Inevitable Hour* helps to explain why a movement to restore dignity to the dying arose in the early 1970s and why its goals have been so difficult to achieve Current Catalog National Library of Medicine (U.S.),1993-04 *The Risks of Medical Innovation* Thomas Schlich,Ulrich Tröhler,2006 Presenting a new way of thinking about the risks of medical innovation this volume considers the issues from a social historical perspective and studies specific cases in their respective contexts
