

Medical nutrition in special cases

The non-intubated patient

41) In non-intubated patients not reaching the energy target with an oral diet, oral nutritional supplements should be considered first and then EN. (R41, GPP, 96%)

42) In non-intubated patients with dysphagia, texture-adapted food can be considered. If swallowing is proven unsafe, EN should be administered. (R42, GPP, 94%)

43) In non-intubated patients with dysphagia and a very high aspiration risk, postpyloric EN or, if not possible, temporary PN during swallowing training with removed nasointestinal tube can be performed. (R43, GPP, 92%)

The surgical patient

44) In patients after abdominal or esophageal surgery, early EN can be preferred over delayed EN. (R45, O, 96%)

45) In critically ill patients with surgical complications after abdominal or esophageal surgery and unable to eat orally, EN (rather than PN) should be preferred unless discontinuity or obstruction of GI tract, or abdominal compartment syndrome is present. (R46, GPP, 96%)

46) In the case of an unrepaired anastomotic leak, internal or external fistula, a feeding access distal to the defect should be aimed for to administer EN. (R47, GPP, 96%)

47) In the case of an unrepaired anastomotic leak, internal or external fistula, or if distal feeding access is not achieved, EN should be withheld and PN may be commenced. (R48, GPP, 100%)

48) In case of high output stoma or fistula, the appropriateness of chyme reinfusion or enterocolysis should be evaluated and performed if adequate. (R49, GPP, 100%)

The trauma patient

49) Trauma patients should preferentially receive early EN instead early PN. (R50, B, 96%)

The septic patient

50) Early and progressive EN should be used in septic patients after hemodynamic stabilization. If contraindicated, EN should be replaced or supplemented by progressive PN. (R44, GPP, 94%)

The obese patient

51) An iso-caloric high protein diet can be administered to obese patients, preferentially guided by indirect calorimetry measurements and urinary nitrogen losses. (R51, O, 89%)

52) In obese patients, energy intake should be guided by indirect calorimetry. Protein delivery should be guided by urinary nitrogen losses or lean body mass determination (using computerized tomography or other tools). If indirect calorimetry is not available, energy intake can be based on "adjusted body weight". If urinary nitrogen losses or lean body mass determination are not available, protein intake can be 1.3 g/kg "adjusted body weight"/d. (R52, GPP, 89%)

20critical Care Nutrition Guidelines

Ian Peate, Barry Hill

20critical Care Nutrition Guidelines:

Dietitian's Handbook of Enteral and Parenteral Nutrition Annalynn Skipper, 2012 This thoroughly revised and updated Third Edition of a bestselling handbook provides comprehensive coverage of systems approaches to medical nutrition therapy Designed for graduate nutrition students dietetic interns and practicing dietitians this authoritative handbook provides a solid foundation in and reference to the nutrition support field Expert contributors present a practical approach to the delivery of parenteral and enteral nutrition It covers all of the basics nutritional assessment nutrition management monitoring and complications and formulas as well as new topics wound healing trauma and critically ill obese patients This is the first textbook to fully integrate the Nutrition Care Process into enteral and parenteral nutrition content as specified in the 2008 Commission on Accreditation of Dietetic Education Standard II The Nutrition Care Process content is updated to reflect changes from the 2011 edition of the International Dietetics and Nutrition Terminology *Nutritional Management of the Surgical Patient* Mary E. Phillips, 2023-08-07 Nutritional Management of the Surgical Patient Manage patient diet and nutrition with this comprehensive guide Nutritional Management of the Surgical Patient provides the first comprehensive evidence based overview of the nutritional and dietary therapies for surgical patients It takes clinicians through every stage of surgery from pre operative and immediate post operative care through to long term recovery and survivorship This book describes the impact of surgical procedures and their complications and the effect these have on nutritional status as well as the nutritional strategies utilised to manage patients in these settings The result is a valuable survey of this essential aspect of surgery Nutritional Management of the Surgical Patient features case studies which capture both typical patients and the more unusual cases to help clinicians understand the impact of nutrition in both circumstances The textbook also details a range of surgical procedures to support underpinning knowledge of the mechanism behind nutritional intervention Readers will also find Consideration in each chapter of both short and long term nutritional management Discussion of potential long term complications such as small intestinal bacterial overgrowth bile acid diarrhoea micronutrient deficiencies and osteoporosis Questions to support consolidation of knowledge and promote understanding in clinical context Nutritional Management of the Surgical Patient is a must have for surgeons surgical dietitians trainees and all healthcare professionals involved in the care of surgical patients **Nutrition in Critical Care** Peter Faber, Mario Siervo, 2014-03-06 Provides comprehensive and practical guidance for managing the nutritional requirements of critically ill patients and thereby improving prognosis Oxford Handbook of Critical Care Nursing Fiona Creed, Jessica Hargreaves, 2016 A practical concise easily accessible and evidence based guide for all levels of nursing staff working in critical care environments Textbook of Critical Care Nutrition Subhal Bhalchandra Dixit, Kapil Gangadhar Zirpe, Atul Prabhakar Kulkarni, 2023-11-17 *Joint Trauma System (JTS) Clinical Practice Guidelines*, Over 700 total pages The JTS Clinical Practice Guidelines CPGs are to the greatest extent possible evidence based The guidelines are developed using a rigorous process that involves subject matter

experts in each field evaluating the best available data If you are interested in learning more about the process of developing CPGs please click this link [CPG Development Process](#) This guide for CPG development will help lead you through the methods used to develop and monitor CPGs The JTS remains committed to using the highest levels of analytical and statistical analysis in its CPG development process [COMPLETE LIST OF CURRENT JTS CPGs](#) [JTS CPG Documentation](#)
