grade students to explore mathematical principles as well as global population issues as they consider population density. With this volume in the STEM Road Map Curriculum Series you can. Global Population Issues outlines a journey that will steer your students toward authentic problem solving while grounding them in integrated STEM disciplines. Like the other volumes in the series, this book is designed to meet the growing need to infuse real world learning into K-12 classrooms. This interdisciplinary four lesson module uses project and problem based learning to help students to devise a model for counting populations of a given species on Earth and develop a formal presentation of their models for consideration by a panel of experts. Students will examine species ecosystems, explore global populations with an economic and geographical lens, take on the role of an urban planner to develop a megacity that incorporates what they have researched and learned about the consequences of population density and overpopulation, and share literature relevant to their applied species model. To support this goal, students will do the following: Explore how to gather information about a population and make valid generalizations and inferences from this information. Utilize mathematical practices to complete mathematical explorations. Explore the impact of population density on humans and the environment. Communicate learning and experiences about population density and its influence on humans and the environment through various forms of writing, speaking, and analyzing non-fiction text. Explore the historical, social, geographical, and economic factors related to population density.

The STEM Road Map Curriculum Series is anchored in the Next Generation Science Standards, the Common Core State Standards, and the Framework for 21st Century Learning. In depth and flexible, Global Population Issues can be used as a whole unit or in part to meet the needs of districts, schools, and teachers who are charting a course toward an integrated STEM approach.

The African Charter on the Rights and Welfare of the Child: A Commentary Julia Sloth-Nielsen, Elvis Fokala, Godfrey Odongo, 2025-01-01. Since its adoption in July 1990 and entry into force in November 1999, the African Charter on the Rights and Welfare of the Child (African Children's Charter) has become a key treaty within the African human rights system governing children's rights in Africa. To date, 51 out of 55 African Union member states have ratified the African Children's Charter, which demonstrates a growing commitment to respect, protect, and promote the rights of children. There is no doubt that the Charter, since entering into force, has significantly contributed to the development of standards and practice related to children in Africa. This comprehensive commentary on the African Children's Charter, the first of its kind, provides a systematic analysis of each article of the Charter, tracing the origin of the rights, highlighting and explaining unique African concepts and normative standards featured in the Charter. The Commentary aims to be a one-stop shop for anyone interested in protecting and promoting children's rights in Africa, such as researchers, teachers, students, practitioners, policy makers, and activists. Authored by an array of contributors steeped in African jurisprudence and human rights values, comprising 38 discrete chapters, it constitutes an essential and contemporary guide to the legal understanding of the various provisions the Charter provides for. It is edited by three African scholars prominent in the field of children's rights in Africa: Prof. Julia Sloth-

Nielsen Prof Elvis Fokala and Dr Godfrey Odongo This Commentary is the second in the PULP series of Commentaries on African human rights law The Crusader ,1927 *An Introduction to Education in the People's Republic of China and U.S.-China Educational Exchanges* Thomas Fingar,Linda A. Reed,1982
