

MARK SCHEME for the October/November 2014 series

0610 BIOLOGY

0610/33

Paper 3 (Extended Theory), maximum raw mark 80

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2014 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

The Biology and Conservation of Wild Felids David Whyte Macdonald, Andrew J. Loveridge, 2010-06-03 implications that go far beyond the cat family **Ecological Rationality** Peter M. Todd, Gerd Gigerenzer, 2012-04-10 More information is always better and full information is best More computation is always better and optimization is best More is better ideals such as these have long shaped our vision of rationality Yet humans and other animals typically rely on simple heuristics to solve adaptive problems focusing on one or a few important cues and ignoring the rest and shortcutting computation rather than striving for as much as possible In this book we argue that in an uncertain world more information and computation are not always better and we ask when and why less can be more The answers to these questions constitute the idea of ecological rationality how we are able to achieve intelligence in the world by using simple heuristics matched to the environments we face exploiting the structures inherent in our physical biological social and cultural surroundings *FWS/OBS.* , 1979
