Public involvement has the power to promote an active circulation of media content and can generate economic and cultural value for organizations The current perspectives on interactions between audiences organizations and content production suggests a relational logic between audiences and media through new productivity proposals In this sense it is interesting to observe the reasoning of audience experience through the concepts of interactivity and participation However there is a gap between the intentions of communication professionals and their organizations and the effective circulation and content retention among the audiences of interest as well as the distinction between informing and communicating Navigating Digital Communication and Challenges for Organizations discusses communication research with a focus on organizational communication that includes a range of methods strategies and viewpoints on digital
