Brain Building Problems - Grade 4 Learn 2 Think,2017-03-23 Twenty first century kids would need much more than the traditional skills of reading writing and computation to prepare for the 21st century careers The attribute that will set them apart is not just their knowledge but what they can do with it Thinking wondering and questioning is the only survival skills that will help children to prepare for future Attributes such as problem solving reasoning and pattern recognition creative thinking that show that a student can understand interpret and use the information available would be an impeccable skill set to have Thinking skills are not something that one is innately born with thinking skills can be and must be nurtured taught and learnt with systemic approach and material While a child may get great theory and knowledge lessons but to be good at critical thinking skills it is necessary to internalise the theoretical principles so that we can actually apply them in daily life When we start thinking about the knowledge that we have that s when our knowledge becomes wisdom For example we might study in the classroom about how to swim and learn about all the basic theory about what makes a good swimmer but unless we can apply and explore such theoretical knowledge through constant practice we might not actually be able to swim This book is a good start at the journey of Thinking with your child It aims to supplement and extend children s Mathematical knowledge The fun and engaging Math problems in the book would stretch child s thinking and provide great opportunities for applying the Math concepts learnt at school It s time to not only know your Math but to THINK with it *Go Math!*

between the units and on word problems that involve conversions Students may have difficulty with the conversions and that is why they should also be studied in 5th grade At this point students should be able to easily convert from a bigger unit to a smaller unit such as converting 3 feet into 36 inches or 2 kg into 2 000 grams While the Common Core standards do not include them for 4th grade I have also included some problems where we convert from a smaller unit to a bigger unit such as 4 500 ml into 4 L 500 ml or 12 feet into 4 yards because I feel most children are capable of doing these in 4th grade If you feel your child has difficulty with these types of conversions from a smaller unit to a bigger unit feel free to omit those particular exercises They are intermixed though and not marked in any special way There are separate lessons for customary units and for metric units These lessons include a chart that lists the units and the conversion factors For metric units those charts always include all the units even when they are not in common usage For example one lesson only deals with milliliters and liters However the chart in that lesson also shows the two other units deciliters and centiliters in order to help familiarize the students with these two basic ideas of the metric system The units always differ by a factor of ten The units are named consistently with the same prefixes milli centi deci deka hecto and kilo These prefixes and their meanings are not yet studied in detail in fourth grade You may of course at your discretion explain them to the student
