1 Connect the Hardware

- **Unplug the power** to turn off your modem, if any, and remove the backup battery if it has one.
- Place the router horizontally and orient the antennas vertically.

If your internet connection is through an Ethernet cable directly from the wall instead of through a DSL / Cable / Satellite modem, connect the Ethernet cable to the router's **Yellow** port, and then follow steps 3 and 4 to complete the hardware connection.

Image may differ from actual product.

- 4 Verify that the hardware connection is correct by checking the following LEDs.
