is written for students as well as academic and industrial researchers in software engineering or information systems It provides guidelines on how to effectively structure research goals how to analyze research problems concerning design goals and knowledge questions how to validate artifact designs and how to empirically investigate artifacts in context and finally how to present the results of the design cycle as a whole *Let's Talk with Each Other!* Ulf Lubienetzki, Heidrun Schüler-Lubienetzki, 2022-01-03 Through this compact textbook you will learn in an entertaining way about the most important form of human communication the personal conversation and its essential facets It focuses primarily on communication in a professional context but the principles can of course also be applied to other areas of life Learn how we communicate not only with the spoken word but also with our bodies how we establish contact with our conversation partners and how we achieve that other people feel like and are interested in talking to us This book is a translation of the original German 1st edition *Lass uns miteinander sprechen* by Heidrun Schüler-Lubienetzki Ulf Lubienetzki published by Springer Verlag GmbH Germany part of Springer Nature in 2020 The translation was done with the help of artificial intelligence machine translation by the service DeepL.com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors
