Stefan Wurm, 2020-03-10 Over a very short period only a few hundred years our understanding of the cosmos our planet Earth the evolution of life on it and the beginnings of our very own human endeavor have radically changed These revolutions in science and technology have dramatically altered our societies in many ways For quite some time it seemed as if our planets resources were unlimited Today we know that this is not the case Human civilizations are shaping our planets future in ways that have profound consequences for all other life on Earth as well as for us We need to reflect broadly on what defines our human condition if we wish our societies to be successful in navigating a future that cannot be just ours but must include the broad diversity of life on Earth without which humankind will not survive This book tells the story of how we discovered the universe how we learned about our planet and the life evolving on it how humanity emerged from pre history and what some of the future of our civilizations could hold *Social Information Transmission and Human Biology* Jonathan

CK Wells, Simon Strickland, Kevin Laland, 2006-05-22 Recent research has emphasized that socially transmitted information may affect both the gene pool and the phenotypes of individuals and populations and that an improved understanding of evolutionary issues is beneficial to those working towards the improvement of human health In response to a growing interest across disciplines for information regarding the contribution of social behavior to a range of biological outcomes *Social Information Transmission and Human Biology* connects the work of evolutionary theorists and those dealing with practical issues in human health and demographics Combining evolutionary models with biomedical research authors from various disciplines look at how human behavior influences health and how reproductive fitness sheds light on the processes that shaped the evolution of human behavior Both academic and medical researchers will find much useful insight in this text

Human Evolution Roger Lewin, 2009-02-18 The brief length and focused coverage of *Human Evolution An Illustrated Introduction* have made this best selling textbook the ideal complement to any biology or anthropology course in which

human evolution is taught The text places human evolution in the context of humans as animals while also showing the physical context of human evolution including climate change and the impact of extinctions Chapter introductions numerous drawings and photographs and an essential glossary all add to the accessibility of this text The fifth edition has been thoroughly updated to include coverage of the latest discoveries and perspectives including New early hominid fossils from Africa and Georgia and their implications New archaeological evidence from Africa on the origin of modern humans Updated coverage of prehistoric art including new sites New perspectives on molecular evidence and their implications for human population history An Instructor manual CD ROM for this title is available Please contact our Higher Education team at HigherEducation.wiley.com for more information

Neurological Problems in the Elderly - Bridging Current State and New Outlooks Patricia Bozzetto Ambrosi, 2025-05-07 The book will address the challenges that healthcare providers face in delivering comprehensive neurological care to the ageing population It will highlight barriers to care pathways and propose solutions derived from recent literature to increase confidence and competence in managing complex cases as new insights are shared in educational settings Also it will evolve the landscape of neurological care addressing the needs of an aging population reflecting on the changing demographics of healthcare and the increasing prevalence of neurological disorders among older adults It discusses how healthcare systems can adapt to meet the growing demand for specialized care and the need for ongoing education and training for caregivers and healthcare providers
