

A Comparative analysis of two ESP research papers: a schema-based approach

Sara Shoghli Javan
Ebrahim Khodadady
Ferdowsi University of Mashhad

Abstract

This paper examines two research papers selected on the basis that they belong to the same genre, i.e. English for Specific Purposes (ESP). Drawing on the underlying principles of genre we assumed that since these papers belong to the same genre they share similar patterns in terms of their constitutive schemata. By means of Schema theory, offered by Khodadady (2008), we assigned the schemata to three domains of semantic, syntactic and parasyntactic. Comparing the two papers with regard to their schema types and tokens, we came to the conclusion that the semantic, syntactic and parasyntactic schemata constituting these papers significantly differ from each other. Moreover, each domain within one paper is statistically different from its counterpart in the other paper. Bearing in mind the fact that statistics cannot reveal the hidden intentions behind a text, we went through the schemata and analyzed each schema with regard to its context of occurrence. Identifying the whole common schemata we looked for the figurative and collocational expressions representative of the genre, however, the results showed that there are few if any kinds of fixed phraseology, metaphorical, idiomatic and collocational frameworks which assert the existence of ESP genre.

Keywords: Schema Theory; Semantic Schemata; Syntactic Schemata; Parasyntactic Schemata; ESP; Genre Analysis; Microstructure; Macrostructure

Citation Analysis in Research Evaluation Henk F. Moed, 2006-03-30 This book is written for members of the scholarly research community and for persons involved in research evaluation and research policy More specifically it is directed towards the following four main groups of readers All scientists and scholars who have been or will be subjected to a quantitative assessment of research performance using citation analysis Research policy makers and managers who wish to become conversant with the basic features of citation analysis and about its potentialities and limitations Members of peer review committees and other evaluators who consider the use of citation analysis as a tool in their assessments Practitioners and students in the field of quantitative science and technology studies informetrics and library and information science Citation analysis involves the construction and application of a series of indicators of the impact influence or quality of scholarly work derived from citation data i e data on references cited in footnotes or bibliographies of scholarly research publications Such indicators are applied both in the study of scholarly communication and in the assessment of research performance The term scholarly comprises all domains of science and scholarship including not only those fields that are normally denoted as science the natural and life sciences mathematical and technical sciences but also social sciences and humanities

HM Government: Scotland Analysis: Science and Research Great Britain: Scotland Office, 2013-11-11 This paper is the latest in the Scotland analysis series and explores how an integrated domestic environment for research in publicly funded institutions supports the UK s including Scotland s excellent and thriving research base which is vital for innovation and economic success An independent Scottish state would become responsible for deciding how much to spend on research activity and how to distribute research funding In order to replace the 2012 13 level of Research Council expenditure in Scotland 307 million the government of an independent Scottish state would have to spend 0 23 per cent of 2012 GDP on research or seek additional funding from elsewhere such as overseas businesses or charities Businesses and research charities could however face additional administrative burdens created by divergences in regulatory regimes and tax jurisdictions meaning funding projects in both the continuing UK and an independent Scottish state could become more complex UK national institutions would operate on behalf of the continuing UK as before but would have no power or obligation to act in or on behalf of an independent Scottish state In the event of independence the single strategic and highly integrated research framework would be likely to diverge as an independent Scottish state set and deliver its own research priorities Research collaborations between the continuing UK and an independent Scottish state would be international

collaborations associated with levels of risk not present in domestic collaborations Research excellence is also supported by the ability of researchers and staff to move freely across the UK and elsewhere thereby supporting the flow of knowledge

Green Chemical Analysis and Sample Preparations Mahmoud H. El-Maghrabey, V. Sivasankar, Rania N. El-Shaheny, 2022-06-20 This volume focuses on the most recent trends for greening analytical activities beginning with an introduction to green analytical chemistry followed by a discussion of green analytical chemistry metrics and life cycle assessment approach to analytical method development The chapters discuss two main topics first is the most recent techniques for greening sample pretreatment steps and second is modern trends for tailoring analytical techniques and instrumentation to implement the green analytical chemistry concept The role of different kinds of green solvents such as ionic liquids supercritical fluids deep eutectic solvents bio based solvents and surfactants as

well as nanomaterials and green sorption materials in greening sample extraction steps is also a focus of this book Furthermore different approaches for greening chromatography as a key analytical technique are discussed The applications of nanomaterials in analytical procedures are deeply reviewed and miniaturization of spectrometers is also discussed as a recently evolved approach for efficient green on site analysis This book will appeal to a wide readership of academic and industrial researchers in different fields It can be used in the classroom for undergraduate and postgraduate students focusing on the development of new analytical procedures for organic and inorganic compounds determination in different kinds of samples characterized by complex matrices composition The book will also be useful for researchers that are interested in both chemical analysis and environment protection
