Question 1

1 point

Many do you think the profit margin for Anagene's cartridges has been fluctuating? Is likely attributable to the actual number of cartridges sold at this cartridge-changing, or because of the existing system they are using to calculate the cost?

The actual number of cartridges sold at this cartridge-changing has changed. The company revised the estimated number of cartridges produced and revised the calculation of the costs per unit. This led to the estimated cartridge unit cost change. Finally, comparing actual to estimated cartridge quantity should be calculated production costs only.
