5 Kinds of Nonfiction Melissa Stewart, Marlene Correia, 2023-10-10 Once upon a time children's nonfiction books were stodgy, concise and not very kid friendly. Most were text heavy with just a few scattered images decorating the content and meaning rather than enhancing it. Over the last 20 years, children's nonfiction has evolved into a new breed of visually dynamic and engaging texts. In *5 Kinds of Nonfiction: Enriching Reading and Writing Instruction with Children's Books*, Melissa Stewart and Dr. Marlene Correia present a new way to sort nonfiction into five major categories and show how doing so can help teachers and librarians build stronger readers and writers. Along the way, they introduce the 5 kinds of nonfiction: Active, Browseable, Traditional, Expository, Literature, and Narrative, and explore each category through discussions, classroom examples, and insights from leading children's book authors. Offer tips for building strong, diverse classroom texts and library collections. Provide more than 20 activities to enhance literacy instruction. Include innovative strategies for sharing and celebrating nonfiction with students. With more than 150 exemplary nonfiction book recommendations and Stewart and Correia's extensive knowledge of literacy instruction, *5 Kinds of Nonfiction* will elevate your understanding of nonfiction in ways that speak specifically to the info kids in your classrooms but will inspire all readers and writers.

Text Analysis Pipelines Henning Wachsmuth, 2015-12-02 This monograph proposes a comprehensive and fully automatic approach to designing text analysis pipelines for arbitrary information needs that are optimal in terms of run-time efficiency and that robustly mine relevant information from text of any kind. Based on state-of-the-art techniques from machine learning and other areas of artificial intelligence, novel pipeline construction and execution algorithms are developed and implemented in prototypical software. Formal analyses of the algorithms and extensive empirical experiments underline that the proposed approach represents an essential step towards the ad hoc use of text mining in web search and big data analytics. Both web search and big data analytics aim to fulfill people's needs for information in an ad hoc manner. The information sought for is often hidden in large amounts of natural language text. Instead of simply returning links to

potentially relevant texts leading search and analytics engines have started to directly mine relevant information from the texts To this end they execute text analysis pipelines that may consist of several complex information extraction and text classification stages Due to practical requirements of efficiency and robustness however the use of text mining has so far been limited to anticipated information needs that can be fulfilled with rather simple manually constructed pipelines A *Common Sense Guide for Teaching Common Core Literacy* Jennifer Dutra,2014-07-01 A Common Sense Guide for Common Core Literacy is a must have for teachers who are responsible for implementing the new Common Core State Standards in their classrooms With nearly 1 000 pages of information Common Core aligned sample questions and reproducible classroom ready resources it is guaranteed to assist teachers in making the transition to the new CCSS Not only will this book help teachers better understand the standards what they mean how they are crafted and how they build on one another from one grade to the next but it will explain how to implement the standards in their classrooms how to align their existing materials to the CCSS and how to craft formative and summative assessments to track student mastery of the standards The resources provided in this book aim to help teachers make the Common Core State Standards work for them Nobody wants to have to throw away years of hard work spent on crafting refining and perfecting lessons materials and assessments just because they were aligned to an old set of standards and this doesn't have to be the case With this book teachers can build off of their existing curriculum and make connections between what they are already doing and what is required by the new CCSS Teachers departments professional learning communities schools and districts all play a role in implementing the CCSS and whether individual teachers use this book to help achieve their own goals for integrating the standards into their classrooms or entire districts use it is a resource to train teachers and administrators in how to implement the standards create quality Common Core aligned assessments and track student mastery of the standards this book contains a wealth of invaluable information and resources that can help make the transition to the Common Core State Standards easier for everyone

Bergmann, 2023-10-19 This open access book examines how and why various forms of climate im mobilities can impact people s objective and subjective well being Worsening climate impacts are forcing subsistence farmers worldwide to decide between staying or leaving their homes This mixed methods study analyzes cases of climate related migration displacement relocation and immobility in Peru s coastal highland and rainforest regions The results reveal that numerous farmers experienced profound and often negative well being impacts regardless of whether they stayed or migrated The higher the structural constraints such as weak governance and the more damaging the climate impacts were the higher the risk of well being declines Additionally the affected individuals often had limited agency and ability to mitigate losses These findings challenge the notion of migration as adaptation and emphasize the importance of safeguarding the human rights and security of those affected while addressing loss and damage Without significant investments in such efforts climate impacts could sharply diminish the well being of numerous subsistence farmers worldwide irrespective of whether they stay or migrate

Developing Enterprise Chatbots Boris Galitsky, 2019-04-04 A chatbot is expected to be capable of supporting a cohesive and coherent conversation and be knowledgeable which makes it one of the most complex intelligent systems being designed nowadays Designers have to learn to combine intuitive explainable language understanding and reasoning approaches with high performance statistical and deep learning technologies Today there are two popular paradigms for chatbot construction

1 Build a bot platform with universal NLP and ML capabilities so that a bot developer for a particular enterprise not being an expert can populate it with training data 2 Accumulate a huge set of training dialogue data feed it to a deep learning network and expect the trained chatbot to automatically learn how to chat Although these two approaches are reported to imitate some intelligent dialogues both of them are unsuitable for enterprise chatbots being unreliable and too brittle The latter approach is based on a belief that some learning miracle will happen and a chatbot will start functioning without a thorough feature and domain engineering by an expert and interpretable dialogue management algorithms Enterprise high performance chatbots with extensive domain knowledge require a mix of statistical inductive deep machine learning and learning from the web syntactic semantic and discourse NLP ontology based reasoning and a state machine to control a dialogue This book will provide a comprehensive source of algorithms and architectures for building chatbots for various domains based on the recent trends in computational linguistics and machine learning The foci of this book are applications of discourse analysis in text relevant assessment dialogue management and content generation which help to overcome the limitations of platform based and data driven based approaches Supplementary material and code is available at <https://github.com/bgalitsky> relevance based on parse trees
