Learning Approach Kirk Lalwani,Ira Todd Cohen,Ellen Y. Choi,Vidya T. Raman,2018-10-15 Linking existing knowledge to new knowledge by presenting it in the form of a case or a problem is a popular and effective educational approach resulting in better retention of the knowledge and improved ability to apply that knowledge to solve real problems This problem based learning PBL method was introduced into medical education at McMaster University in Ontario Canada in 1969 Since then it has been widely incorporated into secondary undergraduate and graduate education in a variety of disciplines worldwide

This new volume for the Anesthesiology Problem Based Learning series reviews pediatric anesthesia utilizing the PBL approach. Each chapter deals with conditions and problems in pediatric anesthesia practice presented as a case stem with questions to encourage critical thinking followed by an evidence based discussion and multiple choice questions for self assessment. Cases were carefully selected to present a broad systems based tour of commonly encountered clinical cases in pediatric anesthesia. The book can be used to review an upcoming clinical case or as a PBL tool. The Stem Case and Key Questions and Discussion sections can serve as the basis for interactive learning experiences for study groups or as a broad yet in depth clinical review of the subspecialty for the individual learner. Self assessment questions can be used as a measure of knowledge acquisition or simply as a question bank to prepare for examinations.

Wilkins' Clinical Assessment in Respiratory Care - E-Book Albert J. Heuer, 2021-07-24 Master the patient assessment skills you need to provide effective respiratory care. Wilkins Clinical Assessment in Respiratory Care 9th Edition prepares you to assist physicians in the decision making process regarding treatment evaluation of the treatment's effectiveness and determining if changes in the treatment need to be made. Chapters are updated to reflect the latest standards of practice and the newest advances in technology. From lead author Dr Albert Heuer, a well known educator and clinician, this market leading text also aligns content with National Board for Respiratory Care exam matrices to help you prepare for success on the NBRC's CRT and RRT credentialing exams. Comprehensive approach addresses all of the most important aspects and topics of assessment so you can learn to assess patients effectively. Case studies provide real life clinical scenarios challenging you to interpret data and make accurate patient assessments. Questions to Ask boxes identify the questions practitioners should ask patients e.g. coughing, sputum, shortness of breath or questions to ask themselves e.g. lung sounds they are hearing, blood pressure, respiratory rate when confronted with certain pathologies. Learning objectives, key terms and chapter outlines begin each chapter and introduce the content to be mastered. Assessment questions in each chapter are aligned to the learning objectives and reflect the NBRC Exam format with answers located on the Evolve companion website. Key Points at the end of each chapter emphasize the topics identified in the learning objectives providing easy review. Simply Stated boxes highlight and summarize key points to help you understand important concepts. NEW Updated content throughout the text reflects the latest evidence based practices and clinical developments including infection control measures, imaging techniques, assessment of critically ill patients and the increased reliance on telehealth and electronic health records. NEW Updated and revised content aligns with the latest NBRC credentialing exam matrix. NEW Take Home points are included for each chapter plus cases as well as questions and answers for students to use in testing and applying their knowledge.

A People's History of Computing in the United States Joy Lisi Rankin, 2018-10-08 Silicon Valley gets all the credit for digital creativity but this account of the pre PC world when computing meant more than using mature consumer technology challenges that triumphalism. The invention of the personal computer liberated users from corporate mainframes and brought computing into

homes But throughout the 1960s and 1970s a diverse group of teachers and students working together on academic computing systems conducted many of the activities we now recognize as personal and social computing Their networks were centered in New Hampshire Minnesota and Illinois but they connected far flung users Joy Rankin draws on detailed records to explore how users exchanged messages programmed music and poems fostered communities and developed computer games like The Oregon Trail These unsung pioneers helped shape our digital world just as much as the inventors garage hobbyists and eccentric billionaires of Palo Alto By imagining computing as an interactive commons the early denizens of the digital realm seeded today s debate about whether the internet should be a public utility and laid the groundwork for the concept of net neutrality Rankin offers a radical precedent for a more democratic digital culture and new models for the next generation of activists educators coders and makers
