American Creationism, Creation Science, and Intelligent Design in the Evangelical Market Benjamin L. Huskinson, 2020-08-19 In this compelling and thoroughly researched book Benjamin Huskinson demonstrates that just as there is broad diversity within evangelicalism so too there is broad diversity among creationists His work on the Intelligent Design movement is superb and he prompts me to rethink my long held conviction that Intelligent Design is merely the most recent evolutionary form of creationism This is a very fine book Randall Balmer Author of Evangelicalism in America and writer host of In the Beginning The Creationist Controversy Benjamin Huskinson's study of American creationism will be an eye opener for those who sit on the opposite side of the evolution debate He shows that far from being a unified assault on Darwinism the campaign was actually a sequence of separate movements launched by rival evangelical groups competing for influence within their own community Peter Bowler Author of Monkey Trials and Gorilla Sermons Evolution and Christianity from Darwin to Intelligent Design A thoughtful and careful analysis that throws as much light on the diversity of American evangelicalism as it does on Christian attitudes to evolutionary theory Huskinson offers a smart analysis of religious anti evolution movements which neither demonises nor ridicules but seeks to understand the tenets and beliefs of a movement far more complex and multivalent than most of us appreciate A must read for science communicators Philippa Levine Walter Prescott Webb Chair in History and Ideas University of Texas at Austin USA This book explores the cultural history of anti evolution efforts in the United States from 1960 to the present refuting several popular narratives about creation science in evangelical America Separating theological terms like creationism from cultural movements such as creation science and intelligent design in an evangelical marketplace of ideas it contests assumptions that evangelical movements against evolution are homogeneous and it argues that intelligent design is not an off shoot of the creation science movement It demonstrates that the rationale of creationist groups is relational as well as ideological showing that the social function of American creationism which is to establish the boundaries of orthodox religion is key to understanding the competing strategies of creation science organisations

The Heresy of Ham, Revised Edition Joel Edmund Anderson, 2024-11-07 One of the most controversial issues in our society today especially within Evangelicalism is that of the creation evolution debate Over the past few decades Fundamentalist apologists like Ken Ham of the young earth creationist organization Answers in Genesis have made a career convincing people that the age of the Earth and the historicity of Genesis 1 11 are not just bedrock fundamental tenets of the Christian faith but are also crucial fronts in the culture war In *The Heresy of Ham* Joel Edmund Anderson convincingly shows that not only are the YECist claims of Ken Ham unbiblical and unscientific but they have sowed the seeds of strife and division within countless Christian communities He should know he lost his job as a biblical worldview teacher at a small Evangelical school over the issue of YECism Anderson s ultimate message is simple regardless of your position regarding evolution or the interpretation of Genesis 1 11 they are not fundamental to the Christian faith and should not be used as battlefronts in the culture war If you have always had questions about the creation evolution debate the claims of YECism and the way Genesis 1 11 should be interpreted *The Heresy of Ham* is a tremendous resource for anyone struggling coming to grips with these issues

Analysis of Creationism in the United States from Scopes (1925) to Kitzmiller (2005) and its Effect on the Nation's Science Education System Elizabeth Watts, 2018 Creationism is based on a fundamental belief in the inerrancy of the bible and negatively affects science education because creationist proponents insist on the inclusion of supernatural explanations for the appearance of species in particular the origin of humans This detrimental effect on education is particularly relevant in the United States where almost 70% of the population rejects the idea of naturalistic evolution and the majority of American students struggle to meet the college readiness benchmarks in science and math This dissertation provides a

comprehensive look at the issue from historical judicial and educational perspectives Twenty four legal cases in the United States regarding anti evolutionary strategies were analyzed in detail Strategic trends were identified ranging from the statewide banning of evolution in public schools to the required teaching of Creation Science The exact effect of creationist political activity was discerned through the analysis of state science standards and textbook adoption processes which illustrated the creationists ability to lobby for a diminished coverage of evolution in science standards and textbooks It was found that despite attempts made by scientific and educational agencies to provide guidelines such as the Next Generation Science Standards the majority of American state science standards continue to be sub par and one of the major flaws of these standards is the overall attempt to weaken the coverage of evolution throughout the standards A similar loss of quality occurs in textbooks since publishers engage in self censorship in order to avoid controversial topics such as evolution in order to prevent their books from being rejected An examination of the free choice learning materials revealed that creationist proponents are very active and successful in producing books films and museums for the sole purpose of promoting creationism Moreover a brief look at the creationist movement in Germany provided a powerful comparison to the United States and elucidated the key components necessary for a creationist movement to exist and flourish namely the presence of fundamentalist willing to fight to get anti evolutionary materials introduced into science classrooms This study provides new insights into the creationist phenomenon present not only in the United States but also increasingly present in European countries such as Germany Understanding the detrimental link between creationism and science education will help the science community realize that this topic needs to be continually readdressed and that it is imperative that these creationist trends are not dismissed as inconsequential Righting America at the Creation Museum Susan L.

Trollinger, William Vance Trollinger, 2016-05-15 In Righting America at the Creation Museum Susan L Trollinger and William Vance Trollinger Jr take readers on a fascinating tour of the museum The Trollingers vividly describe and analyze its vast array of exhibits placards dioramas and videos from the Culture in Crisis Room where videos depict sinful characters watching pornography or considering abortion to the National Selection Room where placards argue that natural selection doesn't lead to evolution The book also traces the rise of creationism and the history of fundamentalism in America

Controversy of the Ages Theodore Cabal, Peter Rasor, II, 2018-08-08 Controversy of the Ages carefully analyzes the debate by giving it perspective Rather than offering arguments for or against a particular viewpoint on the age of the earth the authors take a step back in order to put the debate in historical and theological context The authors of this book demonstrate from the history of theology and science controversy that believers are entitled to differ over this issue while still taking a stand against theistic evolution But by carefully and constructively breaking down the controversy bit by bit they show why the age issue is the wrong place to draw a line in the sand **A Christian Student'S Guide to Truth in Science** Stanley J. O'Briant, 2015-03-13 This book exposes the attempt to teach atheistic evolution to students often ridiculing their faith in God

The classrooms in our schools have become the battlegrounds for the minds of our children. Since the introduction of evolution by Charles Darwin, there has been a growing list of atheist professors who vigorously fight any religion. The classrooms of America should not be the battlegrounds of any religion, but evolution is a religion. It has no place in the classroom since it does not offer any information that improves the teaching of any science class except evolution itself. There is no proof of evolution, only assertions, innuendos, credulity, belief without proof, and suppositions. Fully one third of all geology textbooks deal with evolution, which is founded only on opinion and undocumented assertions. Therefore, it should be removed from all textbooks.

Dr. David Menton, who taught medicine at the Washington School of Medicine in St. Louis, Missouri, for twenty-five years, stated that he never once needed to reference evolution in any medical class. A coalition of organizations, such as the National Academy of Sciences (whose members are 93% atheist or agnostic) and the National Center for Science and Education, control most of the government grants intended for schools; they fully support the atheism of evolution and they attack any criticism of evolution.

Already Compromised Dr. Greg Hall, Steve Ham, Todd Hillard, 2011-05-01

Will a Christian college build a student's faith or tear it down? Parents and students sacrifice large sums of money for a Christian college education. Why? They are purchasing a guarantee: their child's faith in God and the Bible will be guarded and developed. But is the Bible being taught? Will they graduate believing in the inerrancy of Scripture, the Flood of Noah's Day, and a literal six-day creation? Apologetics powerhouse Ken Ham and Dr. Greg Hall reveal an eye-opening assessment of 200 Christian colleges and universities. In an unprecedented 2010 study by America Research Group, college presidents, religion, and science department heads were polled on critical areas of Scripture and core faith questions. Ken Ham is an accomplished author of some of the most popular and effective apologetics research on the market. He is the founder of Answers in Genesis U.S. and the president of the Creation Museum. I have no doubt that the average church member would be shocked and outraged to discover how many supposedly evangelical colleges and universities have more or less given up their commitment to biblical inerrancy and the authority of Scripture, especially when dealing with the early chapters of Genesis. I'm grateful for this important work by Ken Ham and Greg Hall documenting the many compromises that have ravaged the Christian academy.

Already Compromised is a much-needed wake-up call and a summons to arms for faithful, courageous Bible believers. We need to stand up, declare our faith, and defend the truth of Scripture courageously. The stakes are high, and the battle may be more fierce than ever, but God will bless those who honor His Word. May He bless us with clear, unwavering voices.

Creating the Creation Museum Kathleen C. Oberlin, 2020-12-15

Investigates how the Christian fundamentalist movement brings Creationism into the mainstream through a Kentucky museum. In *Creating the Creation Museum*, Kathleen C. Oberlin shows us how the largest Creationist organization, Answers in Genesis AiG, built a museum which has had over three million visitors to make its movement mainstream. She takes us behind the scenes, vividly bringing the museum to life by detailing its infamous exhibits on human fossils, dinosaur remains, and more. Drawing on over three years of research at the Creation

Museum where she was granted rare access to AiG's leadership Oberlin examines how the museum convincingly reframes scientific facts such as modeling itself on traditional natural history museums Through a unique historical dataset of over 1 000 internal documents from creationist organizations and an analysis of media coverage Creating the Creation Museum shows how the museum works as a site of social movement activity and a place to contest the secular mainstream Oberlin ultimately argues that the Creation Museum has real world consequences in today's polarized era
