Mastering the Travel Intermediaries Ben Vinod, 2024-06-25 This book chronicles the role of travel intermediaries global distribution systems GDS travel management companies TMC and online travel agencies OTA in the distribution of travel products The book covers the historical development of these intermediaries and explores their current state and future prospects Almost six decades after the introduction of

computerized reservations systems and four decades after the introduction of Global Distribution Systems that allowed travel agents to make automated airline bookings the distribution of air products is amid a major transition A fundamental change is pricing power which shifts from the GDSs to the airlines for the indirect channel These changes are driven by advancements in technology market economics and airline cost controls leading to the emergence of new revenue models that will permanently alter the landscape of air distribution As a result travel intermediaries are experiencing the effects of these turbulent times and must adopt innovative approaches and initiatives to adapt and transform their business models rather than maintaining the status quo In addition to the ongoing transformation over the next decade the advancements in emerging technologies like blockchain and decentralized digital identity will further revolutionize the distribution landscape across all sectors of the travel industry

Policies and Research in Identity Management Elisabeth de Leeuw, Simone Fischer-Hübner, Jimmy C. Tseng, John Borking, 2010-08-26 st The world of the 21 century is more than ever global and impersonal Criminal and terrorist threats both physical and on the Internet increase by the day The demand for better methods of identification and access control is growing not only in companies and organisations but also in the world at large At the same time such security measures have to be balanced with means for protecting the privacy of users Identity management is put under pressure due to the growing number of frauds who want to hide their true identity This challenges the information security research community to focus on interdisciplinary and holistic approaches while retaining the benefits of previous research efforts In this context the IFIP Working Group 11.6 on Identity Management has been founded in August 2006 The intention of the Working Group is to offer a broad forum for the exchange of knowledge and for the tracking and discussion of issues and new developments In this we take an interdisciplinary approach Scientists as well as practitioners from government and business who are involved in the field of identity management are welcome to participate The IDMAN 2007 Conference on Policies and Research in Identity Management was the very first conference organized by this Working Group We aim to organize conferences bi annually The IDMAN 2007 Conference has been centered around the theme of National Identity Management or in other words identity management in the public sector
