3. If r is the radius of each circle in the diagram at the right, express the area of the shaded region in factored form. Show work.

Rectangle - 3 Circles

$$(2r)(6r) - 3\pi r^2$$

$$12r^2 - 3\pi r^2$$

$$3r^2(4 - \pi)$$

4. Solve and write the solution set. Omit checks.

a. $(n+3)(2n+3) - (n+2)^2 + (n-2)^2$

Handbook of Software Solutions for ICME Georg J. Schmitz, Ulrich Prahl, 2016-12-19. As one of the results of an ambitious project, this handbook provides a well-structured directory of globally available software tools in the area of Integrated Computational Materials Engineering (ICME). The compilation covers models, software tools, and numerical methods, allowing describing electronic, atomistic, and mesoscopic phenomena, which in their combination determine the microstructure and the properties of materials. It reaches out to simulations of component manufacture, comprising primary shaping, forming, joining, coating, heat treatment, and machining processes. Models and tools addressing the in-service behavior, like fatigue, corrosion, and eventually recycling, complete the compilation. An introductory overview is provided for each of these different modelling areas, highlighting the relevant phenomena and also discussing the current state for the different simulation approaches. A must-have for researchers, application engineers, and simulation software providers seeking a holistic overview about the current state of the art in a huge variety of modelling topics. This handbook equally serves as a reference manual for academic and commercial software developers and providers for industrial users of simulation software and for decision makers seeking to optimize their production by simulations. In view of its sound introductions into the different fields of materials physics, materials chemistry, materials engineering, and materials processing, it also serves as a tutorial for students in the emerging discipline of ICME, which requires a broad view on things and at least a basic education in adjacent fields.
