

For #1-6 Name the type of sampling technique used. Then explain why.

1.) The researcher separates the population into a number of statistical subpopulations and then takes a random sample within each subpopulation.

Stratified Random Sample

2.) The researcher separates the population into evenly sized groups, randomly selects one participant in the first group, and then selects every nth participant.

Systematic Random Sample

3.) The researcher chooses the sample from the entire population through a randomization technique, such as drawing names out of a hat or using a random number generator.

Simple Random Sample

4.) The researcher separates the population into groups and then randomly selects some of these groups to participate. All people in each group selected will participate.

Cluster Sampling

5.) CNN wants to conduct a political poll to determine who voters support in the upcoming presidential election. Pollsters are aware that opinions can be affected by geographical region, so they plan to divide the country into regions: Southeast, Northeast, Midwest, Rocky Mountain, Pacific, etc. They will randomly choose 50 people from every region to be in the polling sample.

Stratified Random Sample

6.) The Council at a local high school wants to conduct a survey concerning the quality of the food in the cafeteria. The president posts a council member at every entrance and tells them to pick the first 25 students that came through the door.
