Dorothy M. Melvin, 1982 **Lean Modeling for Engineers** Dan Ryan, 2010 The first book in the DLR Associates series Lean Modeling for Engineers is a reference book used in the DLR Associates seminar by the same name A student uses this book along with seminar materials to complete a three day course in Continuing Education A CD with diagrams figures and tables support the book when the student begins to learn what lean models are and how to perform the cost savings involved with this process The technique of using a lean model in the practice of engineering is a powerful one The use of a laptop wireless routing and portability on and off the job site is absolutely critical as we enter the last ninety years of this century I would encourage you the reader to skip over those chapters that you have already completed in your study of lean productivity analysis This reference book was completed after fifteen years of consulting and thirty years of teaching at Clemson University whenever I found a short cut or a lean process for engineers I put it in a large three ring notebook This publication is the best of the notebook **E - Learning Modules** Dan Ryan, 2012-06-20 The term e Learning is a neologism for CSCL

systems that came about during the emergence of website e learning modules From an e learning perspective conventional e learning systems were then based on instructional packets which were delivered to students using assignments Assignments were evaluated by the instructor In contrast the new e learning places increased emphasis on social learning and use of social software such as blogs wikis podcasts and virtual worlds such as Second Life This phenomenon has also been referred

to as Long Tail Learning E learning by contrast to e learning systems not based on CSCL assumes that knowledge as meaning and understanding is socially constructed Learning takes place through conversations about content and grounded interaction about problems and actions Advocates of social learning claim that one of the best ways to learn something is to teach it to others However it should be noted that many early online courses such as those developed by Murray Turoff and Starr Roxanne Hiltz in the 1970s and 80s at the New Jersey Institute of Technology courses at the University of Guelph in Canada the British Open University and the online distance courses at the University of British Columbia where Web CT now incorporated into Blackboard Inc was first developed have always made heavy use of online discussion between students Also from the start practitioners such as Harasim in 1995 have put heavy emphasis on the use of learning networks for knowledge construction long before the term e learning let alone CSCL was even considered There is also an increased use of virtual classrooms online presentations delivered live as an online learning platform and classroom for a diverse set of education providers such as Minnesota State Colleges and Universities and Sachem MN School District In addition to virtual classroom environments social networks have become an important part of e learning Social networks have been used to foster online learning communities around subjects as diverse as test preparation and language education Mobile Assisted Language Learning MALL is a term used to describe using handheld computers or cell phones to assist in language learning Some feel however that schools have not caught up with the social networking trends Few traditional educators promote social networking unless they are communicating with their own colleagues DLR Associates consulting group first became interested in e learning modules at the annual Distance Learning Conference held at the University of Maine I decided to offer e learning services since we were already evolved with computer assisted education techniques DLR Associates had been involved with CAE since computers were first used in engineering education It was our hope a trend could be started towards blended learning services where computer based activities were integrated with practical or classroom based situations Dan Ryan Professor Emeritus Clemson University
