The following section (51720-51740) lists procedures that may be used separately or in many and varied combinations.
All procedures in this section imply that these services are performed by, or are under the direct supervision of, a physician or other qualified health care professional and that all instruments, equipment, fluids, gowns, gloves, catheters, technician's fees, medications, gloves, trays, tubing, and other similar supplies be provided by that individual. When the individual only interprets the results and/or operates the equipment, a professional component, modifier 26, should be used to identify these services.

- 51720 Simple cystoscopy
- 51721 Complex cystoscopy
- 51722 Complex cystoscopy with ureteral pty profile
- 51723 Complex cystoscopy with ureteral pty profile

- 51736 Bladder pressure studies intravesical
- 51737 Bladder pressure studies intravesical
- 51738 Bladder pressure studies intravesical

Endoscopic descriptions are listed so that the main procedure can be identified without having to list all the minor related functions performed at the same time. For example, ureteral catheterization and/or dilation, ureterotomy, and cystoscopy prior to a transurethral resection of prostate, ureteral catheterization following extraction of ureteral calculus, internal ureterotomy and bladder neck fulguration when performing a cystoscopy for the female urethral syndrome. When the secondary procedure requires significant additional time and effort, it may be identified by the addition of modifier 22.

For example, ureterotomy performed for a documented pre-existing stricture or bladder neck obstruction.
