Math Education for America? Mark Wolfmeyer,2013-12-04 Math Education for America analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States The effort to standardize a national mathematics curriculum for public schools in the U S culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics Rather than looking at the text of specific policy documents this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis Breaking new ground in detailing and theorizing the politics of math education Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments human capital education policy debates over traditional and reform pedagogy the assumed content knowledge deficit of math teachers and the proliferation of profit driven educational businesses By establishing the interconnectedness of these interests with the national math education curriculum he shows how the purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest

Education Networks Joel Spring,2012-03-22 Education Networks is a critical analysis of the emerging intersection among the global power elite information and communication technology and schools Joel Spring documents and examines the economic and political interests and forces including elite networks the for profit education industry data managers and professional educators that are pushing the use of ICT for online instruction test preparation and tutoring data management instructional software packages and more and looks closely at the impact this is having on schools students and learning Making a distinction between mind as socially constructed and brain as a physiological entity Spring draws on recent findings from comparative psychology on the possible effects of ICT on the social construction of the minds of students and school

managers and from neuroscience regarding its effect on students brains Throughout the influence of elite networks and powerful interest groups is linked to what is happening to children in classrooms In conclusion Spring offers bold suggestions to change the course of the looming technological triumph of ICT in the brave new world of schooling *A Guide to High-Stakes Standardized Testing in the United States* Amy L.
