American Catch The Fight For Our Local Seafood:

American Catch Paul Greenberg, 2014 Author Paul Greenberg uncovers the tragic unraveling of the nation's seafood supply telling the surprising story of why Americans stopped eating from their own waters In 2005 the United States imported nearly twice as much seafood as twenty years earlier Bizarrely during that same period our seafood exports quadrupled Greenberg examines New York oysters Gulf shrimp and Alaskan salmon to reveal how this came to be Following the trail of environmental desecration Greenberg comes to view the New York City oyster as a reminder of what is lost when local waters are not valued as a food source A different kind of catastrophe threatens the Gulf of Mexico Asian farmed shrimp have flooded the American market Finally a proposed mining project could undermine the spawning grounds of the biggest wild sockeye salmon run left in the world In his search to discover why this precious resource isn't better protected Greenberg finds the great majority of Alaskan salmon is exported Sockeye salmon is one of the most nutritionally dense animal proteins on the planet yet Americans are shipping it abroad But despite the challenges hope abounds many are working to break the current destructive patterns of consumption and return American catch to American tables From publisher description

Overrun Andrew Reeves, 2019-03-12 Intelligent investigative writing meets experiential journalism in this important look at one of North America's most voraciously invasive species Politicians ecologists and government wildlife officials are fighting a desperate rearguard action to halt the onward reach of Asian Carp four troublesome fish now within a handful of miles from entering Lake Michigan From aquaculture farms in Arkansas to the bayous of Louisiana from marshlands in Indiana to labs in Minnesota and from the Illinois River to the streets of Chicago where the last line of defense has been laid to keep Asian carp from reaching the Great Lakes *Overrun* takes us on a firsthand journey into the heart of a crisis Along the way environmental journalist Andrew Reeves discovers that saving the Great Lakes is only half the challenge The other is a radical scientific and political shift to rethink how we can bring back our degraded and ignored rivers and waterways and reconsider how we create equilibrium in a shrinking world With writing that is both urgent and wildly entertaining Andrew Reeves traces the carp's explosive spread throughout North America from an unknown import meant to tackle invasive water weeds to a continental scourge that bulldozes through everything in its path

Science and Sensibility Michael Vincent McGinnis, 2016-03-22 If humans are to

understand and discover ways of addressing complex social and ecological problems we first need to find intimacy with our particular places and communities Cultivating a relationship to place often includes a negotiating process that involves both science and sensibility While science is one key part of an adaptive and resilient society the cultivation of a renewed sense of place and community is essential as well Science and Sensibility argues for the need for ecology to engage with philosophical values and economic motivations in a political process of negotiation with the goal of shaping humans treatment of the natural world Michael Vincent McGinnis aims to reframe ecology so it might have greater trans scientific awareness of the roles and interactions among multiple stakeholders in socioecological systems and he also maintains that deep ecological knowledge of specific places will be crucial to supporting a sustainable society He uses numerous specific case studies from watershed coastal and marine habitats to illustrate how place based ecological negotiation can occur and how reframing our negotiation process can influence conservation restoration and environmental policy in effective ways

Blue Ecocriticism and the Oceanic Imperative Sidney I. Dobrin, 2021-03-28 This book initiates a conversation about blue ecocriticism critical ethical cultural and political positions that emerge from oceanic or aquatic frames of mind rather than traditional land based approaches Ecocriticism has rapidly become not only a disciplinary legitimate critical form but also one of the most dynamic active criticisms to emerge in recent times However even in its institutional success ecocriticism has exemplified an ocean deficit That is ecocriticism has thus far primarily been a land based criticism stranded on a liquid planet Blue Ecocriticism and the Oceanic Imperative contributes to efforts to overcome ecocriticism s ocean deficit The chapters explore a vast archive of oceanic literature visual art television and film games theory and criticism By examining the relationships between these representations of ocean and cultural imaginaries Blue Ecocriticism works to unmoor ecocriticism from its land based anchors This book aims to simultaneously advance blue ecocriticism as an intellectual pursuit within the environmental humanities and to advocate for ocean conservation as derivative of that pursuit
